Making Of Zimbabwe Decolonization In The Context Of Regional And International Politics:

The Making of Zimbabwe M. Tamarkin, 2012-11-12 First published in 1990 This volume is essentially a study in decolonization The approach of the author is of a conflict resolution process taken from the perspective of 1974 as the chosen point Following the decolonization of the Portuguese colonial empire the uniqueness of the decolonization of Rhodesia became more apparent and the conflict began to realize its full potential The author has taken three analytical concepts the goals continuum the strategic options continuum and the interaction within and between the three levels of the conflict system

Unpopular Sovereignty Luise White, 2015-03-23 In 1965 the white minority government of Rhodesia after 1980 Zimbabwe issued a unilateral declaration of independence from Britain rather than negotiate a transition to majority rule In doing so Rhodesia became the exception if not anathema to the policies and practices of the end of empire In Unpopular Sovereignty Luise White shows that the exception that was Rhodesian independence did not in fact make the state that different from new nations elsewhere in Africa indeed this history of Rhodesian political practices reveals some of the commonalities of mid twentieth century thinking about place and race and how much government should link the two White locates Rhodesia s independence in the era of decolonization in Africa a time of great intellectual ferment in ideas about race citizenship and freedom She shows that racists and reactionaries were just as concerned with questions of sovereignty and legitimacy as African nationalists were and took special care to design voter qualifications that could preserve their version of legal statecraft Examining how the Rhodesian state managed its own governance and electoral politics she casts an oblique and revealing light by which to rethink the narratives of decolonization

Redefining Regional Power in International Relations Miriam Prys, 2012-05-04 This book examines the concept of regional power in international relations Using the emerging powers of India and South Africa as the case studies it explores how regional

powers simultaneously differ and share common features The book develops a method to classify and evaluate different types of regional powers and applies this typology to contemporary case studies of India and South Africa Regional power is often expected to have a positive influence on region specific problems of conflict economic deprivation and political instability In reality an achievement expectations gap can be seen in many regional powers which can be analysed and understood through observable variation in regional power The author discovers that in addition to the management of the internal regional order regional powers have to establish individuality whilst fitting into the global international environment altering both regional dynamics and creating variance in the level of control within the region Elucidating concepts and definitions this book is an accessible and in depth study that both introduces key concepts and provides a framework for the future study of regional power in international relations Redefining Regional Power in International Relations will be of interest to students and scholars of regionalism and international relations *British Book News* ,1990 *The Foreign Policy of the Douglas-Home Government* A.
