Includes bibliography **American Higher Education Since World War II** Roger L. Geiger, 2021-05-25 Geiger provides an in depth history of the remarkable transformation of higher education in the United States in the decades after World War II taking readers from the GI Bill and the postwar expansion of higher education to the social upheaval of the 1960s and 1970s desegregation and coeducation and the challenges confronting American colleges today Shedding light on the tensions and triumphs of an era of rapid change the author shows how American universities emerged after the war as the world's most successful system for the advancement of knowledge how the pioneering of mass higher education led to the goal of higher education for all and how the selectivity sweepstakes for admission to the most elite schools has resulted in increased stratification today Geiger identifies 1980 as a turning point when the link between research and economic development stimulated a revival in academic research and the ascendancy of the modern research university that continues to the present Sweeping in scope this book demonstrates how growth has been the defining feature of modern higher education but how each generation since the war has pursued it for different reasons It provides the context we need to understand the complex issues facing our colleges and universities today from rising inequality and skyrocketing costs to deficiencies in student preparedness and lax educational standards From publisher description Creating the Ethical Academy Tricia Bertram Gallant, 2011-09-22 In this edited volume higher education experts and scholars tackle the challenge of understanding why ethical misconduct occurs in the academy and how we can address it *What Makes Racial Diversity Work in Higher Education* Frank W. Hale, 2023-07-03 A unique reference describing successful diversity initiatives in higher education Higher education like the nation is facing major demographic changes Our colleges and universities recognize they not only have to be more inclusive but that they have to provide an environment that will effectively retain and develop the growing population of ethnically and racially diverse students How ready are they and what should they be doing Frank W Hale Jr known as the Dean of Diversity for his pioneering efforts in establishing Ohio State as one of the institutions graduating the most Black Ph D s has gathered twenty two leading scholars and administrators from around the country who describe the successful diversity programs they have developed Recognizing the importance of diversity as a means of embracing the experiences perspectives and expertise of other cultures this book shares what has been most effective in helping institutions to create an atmosphere and a campus culture that not only admits students faculty and staff of color but accepts and welcomes their presence and participation This is a landmark reference for every institution concerned with inclusivity and diversity The successes it presents offers academic leaders much they can learn from and ideas and

procedures they can adapt as they discuss and develop their own campus policies and initiatives Contributors Samuel BetancesDonald BrownCarlos E Cort sMyra GordonLinda S GreeneFrank W Hale Jr Margaret N HarriganWilliam B HarveyFreeman A Hrabowski IIILee JonesWilliam Brit KirwanPaul KivelAntoinette MirandaJoAnn MoodyLeslie N PollardNeil L RudenstineWilliam E SedlacekMac A StewartM Rick TurnerClarence G WilliamsRaymond A Winbush *Women of Color in Higher Education* Gaëtane Jean-Marie,Brenda Lloyd-Jones,2011-08-31 Focuses on African American Hispanic American Native American and Asian Pacific American women whose increased presence in senior level administrative and academic positions in higher education is transforming the political climate to be more inclusive of women of color Research and Relevant Knowledge Roger L. Geiger,2017-09-29 The rise of American research universities to international preeminence constitutes one of the most important episodes in the history of higher education Research and Relevant Knowledge follows Geiger s earlier volume on American research universities from 1900 to 1940 This second work is the first study to trace this momentous development in the post World War II period It describes how the federal government first relied on university scientists during the war and how the resulting relationship set the pattern for the postwar mushrooming of academic research The first half of the book analyzes the development of the postwar system of academic research exploring the contributions of foundations defense agencies and universities The second half depicts the rise of the golden age of academic research in the years after Sputnik 1957 and its eventual dissolution at the end of the 1960s graduate education When the federal patron soon reduced its largesse university students took the lead in challenging the putative hegemony of academic research The loss of consensus quickly brought the malaise of the 1970s stagnation frustration and equivocation about the research role The final chapter appraises the renaissance of the 1980s based largely on a rapprochement with the private sector and ends by evaluating the embattled status of research universities at the beginning of the 1990s Research and Relevant Knowledge provides the first authoritative analytical account of American research universities during their most fateful half century It will be of critical importance to all those concerned with the future of higher education in the United States **Gendered Futures in Higher Education** Becky Ropers-Huilman,2012-02-01 This volume addresses the ways in which gender takes shape in and is shaped by higher education environments Focusing on historical knowledge and contemporary experience the contributors identify several key gender issues affecting students faculty and leaders in higher education They examine such diverse topics as what lessons women s colleges have to offer violence on campus women faculty and part time employment and intersecting identities of race and gender and they apply critical perspectives to suggest needed change While they may not agree on the necessary strategies to improve higher education environments they do agree that those environments are currently deeply and problematically gendered Sextus Julius Africanus und die byzantinische Chronographie Gelzer,1880
