Making Of American Liberal Theology Idealism Realism And Modernity 1900 1950:

The Making of American Liberal Theology Gary J. Dorrien, 2003-01-01 In this first of three volumes Dorrien identifies the indigenous roots of American liberal theology and demonstrates a wider longer running tradition than has been thought The tradition took shape in the nineteenth century motivated by a desire to map a modernist third way between orthodoxy and rationalistic deism atheism It is defined by its openness to modern intellectual inquiry its commitment to the authority of individual reason and experience its conception of Christianity as an ethical way of life and its commitment to make Christianity credible and socially relevant to modern people Dorrien takes a narrative approach and provides a biographical reading of important religious thinkers of the time including William E Channing Ralph Waldo Emerson Horace Bushnell Henry Ward Beecher Elizabeth Cady Stanton and Charles Briggs Dorrien notes that although liberal theology moved into elite academic institutions its conceptual foundations were laid in the pulpit rather than the classroom *Early Ecotheology and Joseph Sittler* Panu Pihkala, 2017 When did Christians begin to address environmental questions What can be learned from these pioneering thinkers This study reveals that between 1910 and 1954 many theologians called for responsibility towards nature The focal point is the work of Joseph Sittler 1904 1987 an American Lutheran and ecumenical theologian The role of these early ecotheologians is discussed in relation to environmental history and education The findings show that ecotheology was not as strongly separated from other environmentalism as it was after the 1960s Series Studies in Religion and the Environment Studien zur Religion und Umwelt Vol 12 Subject Religious Studies Environmental Studies Ecotheology Joseph Sittler **The Bloomsbury Encyclopedia of Philosophers in America** John R. Shook, 2016-02-11 For scholars working on almost any aspect of American thought The Bloomsbury Encyclopedia to Philosophers in America presents an indispensable reference work Selecting over 700 figures from the Dictionary of Early American Philosophers and the Dictionary of Modern American Philosophers this condensed edition includes key contributors to philosophical thought From 1600 to the present day entries cover psychology pedagogy sociology anthropology education theology and political science before these disciplines came to be considered distinct from philosophy Clear and accessible each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading Featuring a new preface by the editor and a comprehensive introduction The Bloomsbury Encyclopedia to Philosophers in America includes 30 new entries on twenty first century thinkers including Martha Nussbaum and Patricia Churchland With in depth overviews of Waldo Emerson Margaret Fuller Noah Porter Frederick Rauch Benjamin Franklin Thomas Paine and Thomas Jefferson this is an invaluable one stop research volume to understanding leading figures in American thought and the development of American intellectual history **Mysticism and the Inner Light in the Thought of Rufus Jones, Quaker** Helen Holt, 2021-11-01 Rufus Jones promotion of mysticism and his novel formulation of the Inner Light which saw God as an inherent part of human nature were sweepingly influential

within liberal Quakerism in the early 20th century and have had long lasting effects on Quaker faith and practice In spite of the importance of his ideas however they have received little critical attention In *Mysticism and the Inner Light* Helen Holt provides a systematic analysis of Jones thought in historical context showing how he attempted to synthesize his own experience with aspects of the psychology of William James the idealism of Josiah Royce and liberal Christianity She finds that because Jones presented his ideas informally he is sometimes misinterpreted especially regarding his views on Christ and humanism The book draws on Jones extensive corpus and on unpublished archived letters

Scientific and Political Freedom in Islam Uriya Shavit, 2017-02-24 The modernist apologetic approach to the relation between revelation and science and politics has been a central part of Arab discourses on the future of Muslim societies for over a century This approach introduced historical and theological narratives and interpretative mechanisms that contextualize reason and freedom in Islamic terms to argue that unlike with Christianity it is possible for Muslim societies to be technologically and politically advanced without forfeiting revelation as an all

encompassing legally binding guide Scientific and Political Freedom in Islam critically examines the coherence and consistency of modernist apologetic scholars This is done through a discussion of their general theorizing on reason and freedom which is then followed by discussions of their commentaries on specific scientific and political issues in light of their general theorizing Regarding the former the focus is Darwin s theory of evolution while the universality of the Biblical flood the heliocentric model the Big Bang model and Freudianism are also discussed Regarding the latter the focus is Islam s desired structure of government and concept of participatory politics while individual freedoms are also discussed The book argues that the modernist apologetic approach has great potential to be a force for liberalization but also possesses inherent limitations that render its theory on the relation between revelation and freedom self contradictory Introducing a significant body of new information on the reasons for the failure of secularism and democracy and the attitudes towards Darwinism in the Arab world this book is a valuable resource for students and scholars of Islamic Studies comparative religion democracy studies and evolution studies
