Making Of The Modern World:

The Making of the Modern World Christopher Condon,1987 **The Origins of the Modern World** Robert B. Marks,Robert Marks,2007 The Origins of the Modern World offers a refreshing alternative to Eurocentric histories by exploring the roles that Asia Africa and the New World played in creating the world we know today Starting in 1400 it brings the saga of the modern world to the present considering how and why the United States emerged as a world power in the 20th century and why Asia is experiencing resurgence now **The Making of the Modern World** A. Macfarlane,2001-12-17 At the start of the third Christian millennium we are aware of massive political economic and ideological changes which condition the chances of liberty wealth and equality Yet it is surprisingly difficult for us to understand these forces for we cannot see what surrounds us so closely This book analyses our condition by looking at the work of two great thinkers one of whom provides a deep historical perspective the other a wide comparative analysis F W Maitland 1850 1906 was more than the greatest professional historian of modern times he was a philosopher who provides a brilliant sketch of how our strange world has come about particularly in his work on associations and trusts Yukichi Fukuzawa 1835 1901 more than any other created the institutions of modern Japan As an outsider he provides a brilliant insight into the heart of the new capitalist and industrial civilization which had emerged in the west **Day of Empire** Amy Chua,2009-01-06 In this sweeping history bestselling author Amy Chua explains how globally dominant empires or hyperpowers rise and why they fall In a series of brilliant chapter length studies she examines the most powerful cultures in history from the ancient empires of Persia and China to the recent global empires of England and the United States and reveals the reasons behind their success as well as the roots of their ultimate demise Chua s analysis uncovers a fascinating historical pattern while policies of tolerance and assimilation toward conquered peoples are essential for an empire to succeed the multicultural society that results introduces new tensions and instabilities threatening to pull the empire apart from within What this means for the United States uncertain future is the subject of Chua s provocative and surprising conclusion *Hunger* James Vernon,2007-11-30 This book draws together social cultural and political history to show us how we came to have a moral political and social responsibility toward the hungry Vernon forcefully reminds us how many perished from hunger in the empire and reveals how their history was intricately connected with the precarious achievements of Britain s welfare state **The Cold War and the Making of the Modern World** Martin Walker,1993 Beskrivelse af Den kolde Krig og de mest markante h ndelser og konflikter i denne periode *Remaking the Modern World 1900 - 2015* C. A. Bayly,2018-10-22 The sequel and companion volume to C A Bayly s ground breaking *The Birth of the Modern World 1780 1914* this wide ranging and sophisticated study explores global history since the First World War offering a coherent comparative overview of developments in politics economics and society at large Written by one of the leading historians of his generation an early intellectual leader in the study of World History Weaves a clear narrative history that explores the themes of politics economics social cultural and

intellectual life throughout the long twentieth century Identifies the themes of state capital and communication as key drivers of change on a global scale in the last century and explores the impact of those ideas Interrogates whether warfare was really the pre eminent driving force of twentieth century history and what other ideas shaped the course of history in this period Explores the causes behind the resurgence of local conflict rather than global scale conflict in the years since the turn of the millennium Delves into the narrative of inequality a story that has shaped and been shaped by the events of the last hundred years Part of The Blackwell History of the World Series The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past for every curious person in every part of the world It will comprise some two dozen volumes of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time The volumes are narrative in form giving balanced attention to social and cultural history in the broadest sense as well as to institutional development and political change Each provides a systematic account of a very large subject but they are also both imaginative and interpretative The Series is intended to be accessible to the widest possible readership and the accessibility of its volumes is matched by the style of presentation and production

The Origins of the Modern World Robert Marks,2007 Robert B The Origins of the Modern World Robert B. Marks,2024-01-02 This clearly written and engrossing book presents a global narrative of the origins of the modern world from 1400 to the present Unlike most studies which assume that the rise of the West is the story of the coming of the modern world this history drawing upon new scholarship on Asia Africa and the New World and upon the maturing field of environmental history constructs a story in which those parts of the world play major roles including their impacts on the environment Robert B Marks defines the modern world as one marked by industry the nation state interstate warfare a large and growing gap between the wealthiest and poorest parts of the world increasing inequality within the wealthiest industrialized countries and an escape from the environmental constraints of the biological old regime He explains its origins by emphasizing contingencies such as the conquest of the New World the broad comparability of the most advanced regions in China India and Europe the reasons why England was able to escape from common ecological constraints facing all of those regions by the end of the eighteenth century a conjuncture of human and natural forces that solidified a gap between the industrialized and non industrialized parts of the world the mounting environmental crisis that defines the modern world and the ways in which the forces of globalization stress the economic and political underpinnings of the modern world Now in a new edition that brings the saga of the modern world to the present in an environmental context the book considers how and why the United States emerged as a world power in the twentieth century and became the sole superpower by the twenty first century and why the changed relationship of humans to the environment likely will be the hallmark of the modern era the Anthropocene Once again arguing that the US rise to global hegemon was contingent not inevitable Marks also points to the resurgence of Asia and the vastly changed relationship of humans to the environment that may in the long

run overshadow any political and economic milestones of the past hundred years *Troubled Identity and the Modern World* L. Donskis, 2009-05-25 The book maps what Leonidas Donskis terms the troubled identity that is the identity that constantly needs assurance and confirmation Through an identity building and shifting process argues Donskis we can move from political majority to cultural minority or the other way around
