Making Of The Scottish Countryside:

The Making of the Scottish Countryside M.L. Parry, T.R. Slater, 1980-01-01 **Exploring the Scottish Past** Thomas Martin Devine, 1995 This is a collection of fifteen essays written over the last twenty years by one of Scotland's most eminent historians. The material concentrates on four broad themes in seventeenth, eighteenth and nineteenth century Scottish history: Merchants, Unions and Trade; Scottish Economic Development; The Highlands and the Rural Lowlands. *The Making of the Scottish Rural Landscape* David Turnock, 2016-12-05 This book looks at the evolution of rural settlement in Scotland from the Mesolithic period through to the improving movement of the 18th and 19th centuries. The main emphasis is on changes in society and technology but the book also considers how the development of the physical landscape laid the foundation for such changes. The author strikes a balance between general perspectives including relevant contextual materials such as the political structures and local studies with much emphasis on individual sites. Lack of documentation prior to the 10th century places particular importance on the archaeological evidence but imaginative interpretation of this evidence has led to a major re-evaluation. Ideas emphasizing continuity of settlement and local adaptation are replacing older invasionist theories emphasizing Celtic war lords and broch building pirates. **The Scottish Countryside** Rosemary Gibson, 2007 Making use of the extensive plans holdings of the National Archives of Scotland to illustrate the great change on the face of the country, this selection from the 100,000 plans shows the value of these sources for many aspects of Scotland's past and to display snapshots of the landscape through three centuries of change. **The Changing Scottish Landscape** Ian Whyte, Kathleen Whyte, 2021-10-12 Originally published in 1991 and focussing on the countryside, this book examines patterns of settlement and agriculture in Scotland and considers how these were increasingly altered during the 17th and 18th Centuries by the first Improvers and then by the more widespread impact of the Agricultural Revolution. It considers the effect on the landscape of the changing role of the church, the development of improved communications and the rise of new industries. The book analyses in detail the ways in which the landscape changed in Scotland's transition from a medieval impoverished country and an undeveloped economy to a modern society and one of the most highly urbanised countries in Europe.

Landscapes of Protest in the Scottish Highlands after 1914 Iain J.M. Robertson, 2016-04-15 In November 1918 the implementation of agrarian change in the Scottish Highlands threatened another wave of unemployment and eviction for the land working population which led to widespread and varied social protest. Those who had been away on war service and their families faced returning to exactly the same social and economic conditions in the Scottish Highlands they had hoped they had left behind in the struggle to make a land fit for heroes. Widespread and varied social protest rapidly followed. It argues that previously there has been a failure to capture fully the geography, chronology, typology and rate of occurrence of these events. The book not only offers new insights and a greater understanding of what was happening in the Highlands in this period but illustrates how a range of forms of protest were used which demand attention not least for the fact that these

events unlike most of the earlier Land Wars period were successful There are functioning townships in the Highlands today that owe their existence to the land invasions of the 1920s The book innovatively concentrates on formulating explanation and interpretation from within and looks to the crofting landscape as base means and motive to disturbance and interpretation It proposes that protest is much more convincingly understood as an expression of environmental ethics from the bottom up coming increasingly into conflict with conservationist views expressed from the top down It focuses on individual case studies in order to engage more convincingly with an important evidential base that of popular memory of land disturbances and to adopt a frame and lens through which to explore the fluid and contingent nature of protest performances Based upon the belief that in the study of landscapes of social protest the old shibboleth of space as solely passive setting and symbolic register is no longer tenable is paid here to nature culture interactions to vernacular ecological b
