**Gender and Jim Crow** Glenda Elizabeth Gilmore, 2013-04-01 Glenda Gilmore recovers the rich nuances of southern political history by placing black women at its center She explores the pivotal and interconnected roles played by gender and race in North Carolina politics from the period immediately preceding the disfranchisement of black men in 1900 to the time black and white women gained the vote in 1920 Gender and Jim Crow argues that the ideology of white supremacy embodied in the Jim Crow laws of the turn of the century profoundly reordered society and that within this environment black women crafted an enduring tradition of political activism According to Gilmore a generation of educated African American women emerged in the 1890s to become in effect diplomats to the white community after the disfranchisement of their husbands brothers and fathers Using the lives of African American women to tell the larger story Gilmore chronicles black women s political strategies their feminism and their efforts to forge political ties with white women Her analysis highlights the active role played by women of both races in the political process and in the emergence of southern progressivism In addition Gilmore illuminates the manipulation of concepts of gender by white supremacists and shows how this rhetoric changed once women black and white gained the vote

**Cultivating Regionalism** Kenneth H. Wheeler, 2011-11-01 In this ambitious book Kenneth Wheeler

revises our understanding of the nineteenth century American Midwest by reconsidering an institution that was pivotal in its making the small college During the antebellum decades Americans built a remarkable number of colleges in the Midwest that would help cultivate their regional identity Through higher education the values of people living north and west of the Ohio River formed the basis of a new Midwestern culture Cultivating Regionalism shows how college founders built robust institutions of higher learning in this socially and ethnically diverse milieu Contrary to conventional wisdom these colleges were much different than their counterparts in the East and South not derivative of them as many historians suggest Manual labor programs for instance nurtured a Midwestern zeal for connecting mind and body And the coeducation of men and women at these schools exploded gender norms throughout the region Students emerging from these colleges would ultimately shape the ethos of the Progressive era and in large numbers take up scientific investigation as an expression of their egalitarian production oriented training More than a history of these antebellum schools this elegantly conceived work exposes the interplay in regionalism between thought and action who antebellum Midwesterners imagined they were and how they built their colleges in distinct ways
