National Strategic Plan David V. Sandberg, 1999 A technical discussion of the implementation development of models data systems used to manage the air quality impacts of wildland prescribed fires Strategies priorities in the plan were generated by the Express Team a diverse group of 86 subject matter experts who attended a national planning workshop This plan provides a conceptual design as a first step toward balancing the goals of land managers who use fire to manage ecosystems air resource managers who aim to reduce the impacts of fires on air quality Recommends nine strategies as a synthesis of internal discussions review comments

National Strategic Plan ,1999 **Wildland Fire in Ecosystems** ,2003 This state of knowledge review about the effects of fire on air quality can assist land fire and air resource managers with fire and smoke planning and their efforts to explain to others the science behind fire related program policies and practices to improve air quality Chapter topics include air quality regulations and fire characterization of emissions from fire the transport dispersion and modeling of fire emissions atmospheric and plume chemistry air quality impacts of fire social consequences of air quality impacts and recommendations for future research
