New Concepts For New Challenges:

Learning and Expanding with Activity Theory Anna Lisa Sannino, Annalisa Sannino, Harry Daniels, Kris D.

Gutiérrez, 2009-08-17 This book is a collection about cultural historical activity theory as it has been developed and applied by Yrjö Engeström. The work of Engeström is both rooted in the legacy of Vygotsky and Leontiev and focuses on current research concerns that are related to learning and development in work practices. His publications cross various disciplines and develop intermediate theoretical tools to deal with empirical questions. In this volume Engeström's work is used as a springboard to reflect on the question of the use, appropriation and further development of the classic heritage within activity theory. The book is structured as a discussion among senior scholars including Yrjö Engeström himself. The work of the authors pushes on classical activity theory to address pressing issues and critical contradictions in local practices and larger social systems.

Innovation Communities Klaus Fichter, Severin Beucker, 2012-01-03 Self-organising networks have become the dominant innovators of complex technologies and radical innovation. The growing need for co-operation to ensure innovation success calls for a broader understanding of what makes innovation projects successful and requires new concepts. The book introduces the new concept of innovation communities, defining them as informal networks of like-minded individuals who act as innovation promoters or champions. These key figures come from various companies and organisations and will team up in a project-related fashion, jointly promoting a certain innovation product or idea either on one or across different levels of an innovation system. The publication presents findings from surveys that demonstrate that networks of champions are a success factor in radical innovation. Five case studies of noteworthy innovation projects illustrate why the collaboration of champions can make innovation projects more successful. Furthermore, the book presents hands-on methods and includes best practice cases and guidelines on how to develop innovation communities. This publication comprises empirical findings and practical experiences that are valuable for the following groups in particular: Entrepreneurs, Innovation R&D, Innovation and strategy consultants, Innovation and start-up intermediaries, Innovation researchers, Government officials and politicians responsible for R&D and innovation programmes and funding.

New Concepts for New Challenges Josué M. González, Linda Darling-Hammond, 1997 This book discusses the challenges to developing a teaching force that is competent to work with immigrant students arguing that professional development should be re thought and teacher educators should move far beyond traditional inservice and teacher training A framework is developed for considering what teachers of immigrant youth need to understand about their students what kinds of professional development experiences are likely to facilitate those understandings and what kinds of teacher education programs and school settings are able to support their ongoing learning It is argued that professional
