New Construction For Older Buildings A Design Sourcebook For Architects And Preservationists:

New Construction for Older Buildings Peter H. Smeallie, Peter H. Smith, 1990 As a result of the historic preservation movement the addition of new construction to existing architecture is no longer limited to historic or significant buildings This design sourcebook conveys existing attitudes and interesting ideas regarding the combining of old and new architecture and covers the many practical issues architectural firms must consider Each of the three main sections addresses a specific approach to combining old and new architecture additions to buildings altering the original and new construction And each clearly shows that design decisions can and should combine a reasoned approach to the existing environment with the new demands of today Examples by architectural firms such as Roche Dinkeloo SOM Cambridge Seven Associates Geddes Brecher Qualls Cunningham and Paul Rudolph illustrate the wide range of responses to design decisions as well as their varying degrees of success

Traditional Details Charles George Ramsey, Harold Reeve Sleeper, 1998-04-17 A comprehensive source of traditional architectural details for anyone working with old structures Compiling the most useful material from the first four editions of Architectural Graphic Standards published between 1932 and 1951 this book brings back into circulation hundreds of architectural illustrations and standards that have once again become relevant to design work Chapters cover all facets of building construction from foundations to furnishings and are structured to follow the drawing preparation sequence of a typical rehabilitation project Architects designers and others involved in rebuilding and renovating structures built in decades past will find here many of the details and information used by the original architects and builders Impeccably organized and beautifully rendered this handsome reference is both a terrific working tool and a wonderful addition to an architecture library

Building Type Basics for Housing Joan Goody, Robert Chandler, John Clancy, David Dixon, Geoffrey Wooding, 2010-03-08 Essential information for the design of housing Building Type Basics for Housing Second Edition is your one stop reference for the essential information you need to confidently begin the design process and successfully complete the design for housing large or small on time and within budget Members of the award winning design firm Goody Clancy share their firsthand knowledge to guide you through all aspects of designing and building residences The book presents knowledgeable real world advice for architects planners engineers and developers to create excellent residential design projects for a variety of housing types This updated edition offers a new collection of detailed project examples that represent the best in today's housing designs including more information on sustainable design and a fresh look at mixed use developments increasingly popular in urban areas It walks the reader through the guidelines planning concepts and lessons learned from single family detached homes and townhouses to multi family mid rise and high rise buildings Coverage also includes essential topics such as community planning site layout zoning and code issues parking strategies and the selection of building materials This new edition Asks and answers twenty questions that frequently arise in the early phases of a residential commission Provides a number of residential examples new to this edition from the last

decade covering the full range of housing densities Is illustrated with numerous photographs diagrams plans and sections Shows how to obtain financing approvals and support for developments Includes new information on sustainability which is incorporated throughout the book This conveniently organized quick reference is an invaluable guide for busy dedicated professionals who want to get moving quickly as they embark on a new project Like every Building Type Basics book it provides authoritative up to date information instantly and saves professionals countless hours of research **The Benefits of Cultural Resource Conservation** United States. Department of Defense. Legacy Resources Management Program,1994

Analysing Buildings from Context to Detail in Time Hielkje Zijlstra,2009 Technology provided the author of this book with the inspiration to develop a more comprehensive research method to assess buildings Analysing Buildings from Context to Detail in time ABCD Research Method Technology at academic level should be considered in the analysis of a building In this book the focus is on construction engineering the study of the requirements associated with constructing buildings Providing information on practice is a key element in construction engineering which is a learning process Changes are made during the life of a building and they might be made differently if the history and technical aspects of the building were studied in greater detail Both maintenance and changes require us to understand the building concerned *Historic Preservation* ,1993 **Architecture** ,1997 **Progressive Architecture** ,1990 **Architectural Record** ,1994 **New Uses for Obsolete Buildings** Jo Allen Gause,Bruce M. Hoch,John D. Macomber,Jonathan F. P. Rose,1996
