Geyer, 2013-05-02 With the growing challenges of economic globalization and national welfare state retrenchment the development and future of EU social policy has become increasingly important This exciting new textbook provides a comprehensive detailed and up to date overview of this contested area and examines whether EU social policy is strengthening or weakening European social policy regimes The book begins with a general outline of the postwar development of EU social policy and its evolving relationship to the theory and practice of European integration Then it provides a detailed and theoretically engaged description of the main areas of EU social policy including labour gender anti poverty anti discrimination elderly disability youth and public health policy There is also a chapter exploring the social policy role of the structural funds particularly the European Social Fund The book concludes by arguing against both sides of the strengthening weakening debate calling for a more subtle analysis of the effects of EU social policy on national social policy regimes This book is the most up to date and comprehensive available and

offers the reader a detailed and accessible exploration of the area. It will be essential reading for anyone studying the EU or national social policy as well as for practitioners in the field. *Governance in the European Union* Gary Marks, Fritz W Scharpf, Philippe C Schmitter, Wolfgang Streeck, 1996-05-21. A fresh alternative to traditional state centred analyses of the process of European integration is presented in this book. World renowned scholars analyze the state in terms of its component parts and clearly show the interaction of subnational, national and supranational actors in the emerging European polity. This multi level politics approach offers a powerful lens through which to view the future course of European integration. The contributors' empirical exploration of areas such as regional governance, social policy and social movements underpins their broad conceptual and theoretical framework providing significant new insight into European politics.

Social Europe Joe Bailey, 2014-06-03. Since the first edition of *Social Europe* was published in 1992, profound social changes have occurred throughout Europe as a result of conflicting pressures on the one hand to become more integrated and on the other to protect national interests and identity. This second edition of *Social Europe* has been fully revised to provide a comprehensive and focused account of basic social issues and structures which provide the context for these changes. Each chapter covers a key topic such as education, crime, gender, health and religion and provides valuable comparisons between the key nation states of Western Europe. *The Changing Face of European Labour Law and Social Policy* Alan C. Neal, 2004-01-01. In the realm of European employment law, tension exists between the concepts of economic policy and social policy. During recent years, a growing tendency to emphasize the economic at the expense of the social can be discerned. What this trend gives us in the views of the leading figures in the field of European labour law and social policy whose considered analyses are presented in this volume is a regime of grand declarations about workers' rights but with extremely limited enforcement potential. *The Changing Face of European Labour Law and Social Policy* presents some of the papers given at a series of colloquia sponsored by the Employment Law Research Unit at the University of Warwick in early 2002. In its assessment of the forces at work in European employment law today, these commentaries examine significant initiatives and issues including problems arising in the context of the Nice Charter, delivering equality at the workplace under the new EU legal framework, the crisis facing workers' participation in practice, the prospects for trans national collective bargaining, employment related aspects of human rights under the ECHR and attempts to establish effective protections in relation to the working environment. Invaluable appendices include a report as presented by the late Marco Biagi of a high level group on reform of the European labour market, the text of the Social Policy Agenda as approved at the Nice Summit of 2000 and the Commission's scoreboard on the implementation of the Social Agenda as of 2002. With its down to earth analysis of the current status of the floor of rights in the European work environment, *The Changing Face of European Labour Law and Social Policy* will be of inestimable value to all practitioners and scholars seeking to improve the quality of life for Europe's working population and the quality of regulation at the disposal of those charged with confronting the new

challenges to social policy resulting from the radical transformation of Europe's economy and society *State-building in Europe* Volker Bornschier, 2000-10-05 Why and how was the process of Western European integration relaunched in the 1980s and 1990s This volume suggests a new framework of analysis of the European statebuilding tradition Based on qualitative research including more than 30 interviews with protagonists from EU member states and detailed case studies and policy analyses the genesis of the Single Market programme and the Single European Act ESPRIT technology corporatism biotechnology EU regional and social policy the authors show that new forms of cooperation between political and economic actors have developed both at transnational and supranational level The book shows how the European Commission bureaucratic cabinets national diplomats transnational companies pressure groups and representatives of the regions have set in motion a process that is changing statehood in Europe dramatically This discussion of the origins of this process is a valuable contribution to the debate on the future of Europe in the world system
