New Fragments 1897:

Catalogue of the Library of Charles A. Welch, 1907 Charles Alfred Welch, 1907 *The Periodical*, 1925 *The Cambridge Companion to Victorian Culture* Francis O'Gorman, 2010-01-21 The Victorian era produced artistic achievements technological inventions and social developments that continue to shape how we live today This Companion offers authoritative coverage of that period s culture and its contexts in a group of specially commissioned essays reflecting the current state of research in each particular field Covering topics from music to politics art to technology war to domestic arts journalism to science the essays address multiple aspects of the Victorian world The book explores what Victorian has come to mean and how an idea of the Victorian might now be useful to historians of culture It explores too the many different meanings of culture itself in the nineteenth century and in contemporary scholarship An invaluable resource for students of literature history and interdisciplinary studies this Companion analyses the nature of nineteenth century British cultural life and offers searching perspectives on their culture as seen from ours *The Hibbert Journal* Lawrence Pearsall Jacks, George Dawes Hicks, 1905 Huxley's Church and Maxwell's Demon Matthew Stanley, 2014-11-24 During the Victorian period the practice of science shifted from a religious context to a naturalistic one It is generally assumed that this shift occurred because naturalistic science was distinct from and superior to theistic science Yet as Huxley s Church and Maxwell s Demon reveals most of the methodological values underlying scientific practice were virtually identical for the theists and the naturalists each agreed on the importance of the uniformity of natural laws the use of hypothesis and theory the moral value of science and intellectual freedom But if scientific naturalism did not rise to dominance because of its methodological superiority then how did it triumph Matthew Stanley explores the overlap and shift between theistic and naturalistic science through a parallel study of two major scientific figures James Clerk Maxwell a devout Christian physicist and Thomas Henry Huxley the iconoclast biologist who coined the word agnostic Both were deeply engaged in the methodological institutional and political issues that were crucial to the theistic naturalistic transformation What Stanley s analysis of these figures reveals is that the scientific naturalists executed a number of strategies over a generation to gain control of the institutions of scientific education and to reimagine the history of their discipline Rather than a sudden revolution the similarity between theistic and naturalistic science allowed for a relatively smooth transition in practice from the old guard to the new

Hidden Gospels Philip Jenkins, 2002-12-05 This incisive critique thoroughly and convincingly debunks the claims that recently discovered texts such as the Gospel of Thomas the Gospel of Mary and even the Dead Sea Scrolls undermine the historical validity of the New Testament Jenkins places the recent controversies surrounding the hidden gospels in a broad historical context and argues that far from being revolutionary such attempts to find an alternative Christianity date back at least to the Enlightenment By employing the appropriate scholarly and historical methodologies he demonstrates that the texts purported to represent pristine Christianity were in fact composed long after the canonical gospels found in the Bible

Produced by obscure heretical movements these texts have attracted much media attention chiefly because they seem to support radical feminist and post modern positions in the modern church Indeed Jenkins shows how best selling books on the hidden gospels have been taken up by an uncritical drama hungry media as the basis for a social movement that could have powerful effects on the faith and practice of contemporary Christianity

A History of Magic and Experimental Science: The first thirteen centuries of our era Lynn Thorndike,1923 A history of science and magic spanning the period from early Christianity through early modern Europe to the end of the 17th century

The Verbal System in the Hebrew Text of Ben Sira Willem Th. van Peursen,2017-07-03 This volume is a revised and enlarged version of the author s Ph D dissertation 1999 It gives a comprehensive analysis of the morphosyntax and syntax of the tenses in the Hebrew text of Ben Sira Due attention is paid to the heterogeneous character of the textual evidence three manuscripts from the Desert of Judah and six mediaeval manuscripts from the Cairo Geniza which complicates any linguistic study of Ben Sira A descriptive analysis is complemented by a comparison with other contemporaneous earlier and later forms of Hebrew It is argued that the Hebrew of Ben Sira is a literary language in its own right rather than an imitation of Biblical Hebrew or a predecessor of Mishnaic Hebrew

Peak Pursuits Caroline Schaumann,2020-07-28 An interdisciplinary cultural history of exploration and mountaineering in the nineteenth century European forays to mountain summits began in the late eighteenth and early nineteenth centuries with the search for plants and minerals and the study of geology and glaciers Yet scientists were soon captivated by the enterprise of climbing itself enthralled with the views and the prospect of conquering alpine summits Inspired by Romantic notions of nature early mountaineers idealized their endeavors as sublime experiences all the while deliberately measuring what they saw As increased leisure time and advances in infrastructure and equipment opened up once formidable mountain regions to those seeking adventure and sport new models of masculinity emerged that were fraught with tensions This book examines how written and artistic depictions of nineteenth century exploration and mountaineering in the Andes the Alps and the Sierra Nevada shaped cultural understandings of nature and wilderness in the Anthropocene
