New Directions In Piagetian Theory And Practice:

New Directions in Piagetian Theory and Practice Irving E. Sigel, David Brodzinsky, Roberta M. Golinkoff, 1981 **A Self-regulated Learning Approach for Children with Learning/behavior Disorders** Joan Ann Benevento, 2004 This book is designed to be an intervention model based on the concepts of Piaget's study of constructivism. The application of this approach will help children with learning behavioral disorders actively participate in a fuller integration of their own psychomotor affective and cognitive information processing skills and adaptation. The work is directed toward teaching children to acquire the basic skills necessary for living in a multicultural society including academic personal interpersonal communicative and economic proficiency. Each chapter in this book offers a substantial overview. **Piaget's Theory** Harry Beilin, Peter B. Pufall, 2013-04-15 This volume marks the 20th Anniversary Symposium of the Jean Piaget Society. Some of the American contributors were among the first to introduce Piaget to developmental and educational psychology in the United States while some of the international contributors worked with Piaget to develop his program of genetic epistemology and continue to make significant contributions to it. Within this volume the possibility of Piaget's paradigm is reviewed not only as the stuff of normal science yielding fascinating empirical questions that linger within it but also and more importantly as the stuff of revolutionary science with continuing potential to comprehensively structure our thinking about developmental theory. The constructive contribution Piaget's theory has for developmental theory emerges as four central themes in the volume: understanding the intentional or semantic aspect of mental life without abandoning the Piagetian assumption that is rational and committed to truth testing; examining mental life and its development as a dialectical relation of function and structure; a relation Piaget introduced in his study of the developmental relation between procedural and operational knowledge; exploring new and interdisciplinary perspectives on equilibration as the driving force of constructive adaptive processes; understanding social and historical forces in individual and cultural development not necessarily as forces antithetical to Piaget's perspective but as forces that take on new meaning within his framework which avoids erroneous dichotomies such as the distinction between subjective and objective knowledge. **In Search of Understanding**, 1999 Presents key principles of constructivist based learning environments; curriculum based on primary concepts; instruction premised on learners' point of view and assessment in service to the learner. **The Adolescent as Decision-Maker**, 2014-06-28 This book reviews current theories and research on adolescent development and their implications for education. It is organized around the theme of the adolescent as decision maker and covers areas of normal development that are crucial for the transition to independence. The issues raised by the thoughtful reviews will stimulate discussion and debate and will provide new perspectives on adolescence. **The Transition From Prelinguistic To Linguistic Communication** R. M. Golinkoff, 2013-09-05 Published in the year 1983 The Transition From Prelinguistic To Linguistic Communication is a valuable contribution to the field of Developmental Psychology. **Cognitive Development and Education** Johanna

Turner,2017-09-18 Children think in a different way to adults They also think differently at different ages This book originally published in 1984 studies the growth of those processes by means of which thinking evolves from infancy through childhood and adolescence into adulthood It covers perception memory language and above all the development of mental programmes or strategies through which people structure and hence comprehend the information coming to them from their environment The study of cognitive development has obvious educational implications Development in the pre school period the appropriateness of schooling for levels of cognitive competence and the significance of ageing are just some of the issues considered

Critical Readings on Piaget Leslie Smith,2002-09-26 First published in 1996 Routledge is an imprint of Taylor Francis an informa company **Criteria for Competence** Michael Chandler,Michael Chapman,2013-06-17 One of developmental psychology s central concerns is the identification of specific milestones which indicate what children are typically capable of doing at different ages Work of this kind has a substantial impact on the way parents educators and service oriented professionals deal with children and therefore one might expect that developmentalists would have come to some general agreement in regard to the ways they assess children s abilities However as this volume demonstrates the field appears to suffer from a serious lack of consensus in this area Based on the premise that identifying relevant issues is a necessary step toward progress this book addresses a number of vital topics such as How could research into fundamental areas such as the age at which children first acquire a sense of self or learn to reason transitively repeatedly yield wildly diverse results Why do experts who hold to radically different views appear to be so unruffled by this same divergence of professional opinion and Are there grounds for hope that this divergence of professional opinion is on the wane

Development During Middle Childhood Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Committee on Child Development Research and Public Policy,Panel to Review the Status of Basic Research on School-Age Children,1984-01-01 For the first time a report focuses specifically on middle childhood a discrete pivotal period of development In this review of research experts examine the physical health and cognitive development of 6 to 12 year old children as well as their surroundings school and home environment ecocultural setting and family and peer relationships
