New Frontiers in Regional Science: Asian Perspectives, 2016 *New Frontiers in Regional Science* Manas Chatterji, 1990 The first volume of a two volume tribute to Walter Isard the founder of regional science and peace science as rigorous academic disciplines In volume one 19 papers in two sections Optimal spatial patterning of goods and services and Regional and urban development theoretical issues propound new theoretical problems in regional science new th **New Frontiers of Policy Evaluation in Regional Science** Yoshiro Higano, Lily Kiminami, Kenichi Ishibashi, 2022-06-02 This book is especially valuable for its policy evaluation studies using both a theoretical model for policies carried out at national and regional levels and for gathering policy evaluation studies in diverse disciplines by empirical study Policy analysis shown here employs theoretical models such as an international trade model an optimal tariff and spatial reorganization At the same time factors in well being are taken into consideration with land development changes in migration and local economies by natural disasters validation of efficiency for emission control methods the relationship between cyberspace and physical space in urban networks and NPOs investment activities The empirical research reported in this volume analyzes Japan China and Asian Pacific cities In the case of Japan studies focus on the finances of local governments the real estate industry the role of consumer cooperatives in a food system and agriculture and its productivity in hilly and mountainous areas As well the effects of industrial clusters in megacities and investment in high speed railways and prediction of human behavior during an earthquake are studied In China s case studies focus on food policy and the effect of ecology and environment on migration policy For Asia Pacific cities studies show performance rankings of super cities in the region The book defines the frontier of policy evaluation following a middle path between theoretical study and empirical study with regard to evaluation In addition the book contributes to an understanding of the relationship between the goals and targets of sustainable development This book is highly recommended for graduate students policymakers and researchers concerned with policy evaluation **New Frontiers in Regional Science** Manas Chatterji, Robert E. Keunne, 1990-06-18 The first in a two volume tribute to Walter Isard the second being *Dynamics and Conflict in Regional structural Change* this book looks at new frontiers in regional science Together they contains 50 papers by experts in this field and look at subjects such as location theory *Great Minds in Regional Science* Peter Batey, David Plane, 2020-07-31 This is the first volume in a new series on Great Minds in Regional Science which seeks to present a contemporary view on the scientific relevance of the work done by great thinkers in regional science It presents among others Walter Isard Martin Beckmann and Gunnar Myrdal Each contribution combines factual biographical information a description of their major contributions and a discussion of the broader context of the work as well as an assessment of its current relevance scientific recognition and policy impact The book attempts to fill a gap in our knowledge and to respond to the growing interest in the formation and development of the field of regional science and its key influential figures A Broad View of Regional Science Soushi Suzuki, Roberto Patuelli, 2021-01-19 This book

celebrates the life and work of Peter Nijkamp whose research provides a strong focus on regional science His work follows a rigorous comprehensive approach centred around analytical modelling and methodological innovation This edited volume like Prof Nijkamp s research covers a wide range of topics in regional science analysed through multi criteria evaluation evaluation modelling econometrics and simulations among other methods These tools are applied to the analysis of society and culture tourism and information cities environment and sustainability Professor Nijkamp is one of the founders and the past president of the Regional Science Association International His work forms a valuable reference for researchers scholars policymakers and students in the field of regional science and other disciplines This volume timed to coincide with his 75th birthday celebrates Prof Nijkamp s great contributions to regional science He also promoted and participated in the education and development of young researchers not only in regional science but also in other fields supervising many Ph D students and hosting even more as guests in Amsterdam Contributors to this volume include Prof Nijkamp s former doctoral students and guest researchers as well as associates and colleagues

Principles of Regional Science Zheng Wang, 2017-10-17 This book summarizes the research findings in regarding a region as a rational and abstract concept and explores the principles of regional science Focusing on location theory spatial dynamics and regional evolution theory it stresses that the region as a scientific concept is an essential abstract of an economic entity of a place While it introduces a number of case studies the content is general and universal rather than specific Beginning with location theory the basis of regional science it explains how regions breed their own characteristics as economic entities against a background of place For example it discusses the location theory of the tourism industry and analyzes issues of facility location and R D industry location theory The second part of the book addresses interactions with the spatial dynamics including the dynamic mechanism of regions against a background of space Spatial dynamics which includes concepts from statistical physics provides insights into the dynamic mechanism of aggregation diffusion and industrial clustering in regional science as well as in geography and economics The book then describes regional dynamics as a development of spatial dynamics REGION is completely independent as a research object and is no longer part of spatial dynamics This book also discusses in detail regions as the dynamic characteristics of the economy or the basic characteristics of a certain place and examines the theory of regional evolution It argues that regions are evolution and irreversible features of development with path dependence which are the characteristics of a region that differ from general economic phenomena This book by Professor Zheng Wang is outstanding Its focus on Regional Science will open this area up to a wide variety of theoretical and applied researchers I recommend the work without reservations It covers critically important principles in the field and should be read and used by students faculty and applied researchers doing policy analysis I can see this as an important handbook and reference work as well as a textbook in the field Kingsley Haynes

Development Studies in Regional Science Zhenhua Chen, William M. Bowen, Dale Whittington, 2020-02-21 This book examines major policy and planning issues in development studies from the

regional science perspective It investigates questions such as How are communities able to deal with uncertainties raised by conflicts technology and external shocks in the process of development How can nations achieve sustainable development in terms of resource allocation and management and How can developing countries improve their economic competitiveness while maintaining the objectives of equitable and coordinated growth among different regions using case studies that focus on different subfields like infrastructure environment data science sustainability and resilience The book is organized in three parts Part I clarifies fundamental issues regarding development studies and regional science in general while Part II includes several case studies that address development related opportunities and challenges with a focus on Asian countries Lastly Part III offers a global perspective and explores development experiences from countries throughout the world Featuring contributions by leading academics and practitioners working at various organizations linked to international development and including multidisciplinary analyses the book appeals to students who are interested in development studies and regional science It also offers planners and policymakers fresh insights into regional economic development
