Landscape and Identity Wendy Joy Darby, 2020-08-20 In England perhaps more than most places people's engagement with the landscape is deeply felt and has often been expressed through artistic media The popularity of walking and walking clubs perhaps provides the most compelling evidence of the important role landscape plays in people's lives Not only is individual identity rooted in experiencing landscape but under the multiple impacts of social fragmentation global economic restructuring and European integration membership in recreational walking groups helps recover a sense of community Moving between the 1750s and the present this transdisciplinary book explores the powerful role of landscape in the formation of historical class relations and national identity The author's direct field experience of fell walking in the Lake District and with various locally based clubs includes investigation of the roles gender and race play She shows how the politics of access to open spaces has implications beyond the immediate geographical areas considered and ultimately involves questions of citizenship

important landscapes And it does so while there s still time to save some serious part of it Bill McKibben author of *The End of Nature* The North American prairie is an ecological marvel a lush carpet of grass that stretches to the horizon and home to some of the nation s most iconic creatures bison elk wolves pronghorn prairie dogs and bald eagles Plants microbes and animals together made the grasslands one of the richest ecosystems on Earth and a massive carbon sink but the constant expansion of agriculture threatens what remains When European settlers encountered the prairie nearly two hundred years ago rather than a natural wonder they saw an alien and forbidding place But with the steel plow artificial drainage and fertilizers they converted the prairie into some of the world s most productive farmland a transformation unprecedented in human history American farmers fed the industrial revolution and made North America a global breadbasket but at a terrible cost the forced dislocation of Indigenous peoples pollution of great rivers and catastrophic loss of wildlife Today industrial agriculture continues its assault on the prairie plowing up one million acres of grassland a year Farmers can protect this extraordinary landscape but trying new ideas can mean ruin in a business with razor thin margins and will require help from Washington D C and from consumers Veteran journalists and midwesterners Dave Hage and Josephine Marcotty reveal humanity s relationship with this incredible land offering a deep compassionate analysis of the difficult decisions as well as opportunities facing agricultural and Indigenous communities *Sea of Grass* is a vivid portrait of a miraculous ecosystem that makes clear why the future of this region is of essential concern far beyond the heartland
