Population Policy And The U S Constitution:

Population Policy and the U.S. Constitution L.D. Barnett, 2013-03-09 A few decades ago a monograph on the legal aspects of population control would have looked mainly at legal prohibitions. The salient legal problems were restriction of the use of birth control and dissemination of information about it. The assumption in such an approach would have been that effective population control is legally affected only by the clearly stated restrictions in the law. In other respects the law could be assumed to be neutral. Judicial and legislative changes have eliminated practically all restrictions on the means of contraception. This development however has not freed population from its relation to the law; on the contrary it has exposed the importance of law as a motivating force for and against population control. Although much applied work in population control is directed toward the distribution of contraceptives, concentration on the means of population control has shown itself to be of doubtful value. From many sides the primary importance of motivation has been recognized along with the need to influence motivation and to analyze the conditions under which motivational change is possible. At this point the role of the law ix X FOREWORD becomes apparent along with the recognition that law has not been neutral in this issue; that in fact it cannot be neutral. Larry Barnett has undertaken a pioneering effort in identifying the areas of law important to changing people's motivations in regard to population control and to a reduction in individual family size. The U.S. Constitution and Constitutionalism in Africa Kenneth W. Thompson,1990-01-30 More perhaps than any other world region Africa is a living laboratory for observing the interrelation between American European and African ideas of constitutionalism In the post World War II era America sought to bring freedom and self determination to Africa in what we considered a correction of the policies of the European colonial powers The one exception which prevented Americans from claiming to be wholly anticolonial was Libya Elsewhere we saw our goals as convergent with those of Africans and therefore likely to contribute to their political and constitutional growth Africans saw us not only as anticolonial but domestically racist as internationally espousing aims coinciding with theirs but domestically acting in ways antithetical to their values One way or another Americans influenced African developments whether by example or by failure to practice what we preached In either case Africa embraced ideas such as national self determination and racial equality which Americans had professed It is within this broader context that the contributors to this volume have approached constitutionalism

It is hoped that through these discussions, a more complete understanding of these timely issues will emerge. This base of knowledge will help individuals and government leaders develop and implement the types of programs that will result in the effective use and management of land, water, energy, and biological resources for improved food production and a higher standard of living for everyone. The book begins by examining the intrinsic dynamics of natural ecosystems, especially the land, water, atmosphere,

energy and biological components This is followed by chapters on the availability and interrelationships between population size arable land water energy and other biological resources the loss of wild species of plants and animals the availability of agricultural land for crops and livestock and the impact of land degradation on food and other resources Subsequent chapters discuss water use in agriculture the mechanization of agriculture and food production the principles and practices that can make agriculture environmentally and economically sound and sustainable and the impact of population growth on the environment and food supply

Women and the U.S. Constitution Sibyl A. Schwarzenbach, Patricia Smith, 2004-02-18 Women and the U S Constitution is about much more than the nineteenth amendment This provocative volume incorporates law history political theory and philosophy to analyze the U S Constitution as a whole in relation to the rights and fate of women Divided into three parts History Interpretation and Practice this book views the Constitution as a living document struggling to free itself from the weight of a two hundred year old past and capable of evolving to include women and their concerns Feminism lacks both a constitutional theory as well as a clearly defined theory of political legitimacy within the framework of democracy The scholars included here take significant and crucial steps toward these theories In addition to constitutional issues such as federalism gender discrimination basic rights privacy and abortion Women and the U S Constitution explores other issues of central concern to contemporary women areas that strictly speaking are not yet considered a part of constitutional law Women s traditional labor and its unique character and women and the welfare state are two examples of topics treated here from the perspective of their potentially transformative role in the future development of constitutional law

crime and the environment Explains and uses simple economic models and quantitative analysis *Legal Construct, Social Concept* Larry D. Barnett, Based on sophisticated demographic analysis Legal Construct Social Concept argues that legal doctrine on social issues is shaped by the needs and values of society rather than by individuals and interest groups and that it evolves in response to social change but has little impact on that change The book also explains why a substantial body of social science research has found that although law may be effective for some types of economic problems its impact on social problems is generally small and of brief duration At least in the United States legal doctrine seems to operate primarily to provide symbols that enhance commitment to the social system and increase the cohesiveness of the system Barnett s approach to legal thought derives from the practices and assumptions of the social sciences particularly sociology and not from those of critical legal studies His main concern is with social issues issues that substantively differ from economic issues In addressing legal thought on social problems with the conceptual framework and quantitative techniques of macrosociology he considers a topic that is infrequently investigated and employs an approach that is infrequently used To illustrate this thesis Barnett presents data on social patterns relevant to three current issues sex discrimination age discrimination and the availability of contraception and abortion His analyses of these data are compared to constitutional philosophy judicial rulings and federal statutes Barnett then turns from the evolution of legal doctrine in the past to its possible change in the future and considers whether active forms of euthanasia are likely to be legalized He concludes with an exploration of additional issues for future research and theory

Redistricting in Comparative Perspective Lisa Handley, Bernard Grofman, 2008-06-26 The aim of this book is threefold First to put in one place for the convenience of both scholars and practitioners the basic data on redistricting practices in democracies around the world Remarkably this data has never before been collected Second to provide a series of short case studies that look in more detail at particular countries with regard to the institutions and practices that have evolved for redistricting and the nature of the debates that have arisen Third to begin to look in comparative perspective at the consequences of alternative redistricting mechanisms and at the tradeoffs among competing redistricting criteria This volume has contributions from some of the leading specialists on redistricting in the world The chapters reflect a mix of country specific material chapters that are broadly comparative and chapters whose contributions are more methodological in nature The chapters in this volume provide an indispensable introduction to the institutions practices and consequences of boundary delimitation around the world Comparative Politics is a series for students and teachers of political science that deals with contemporary issues in comparative government and politics The General Editors are David M Farrell Jean Monnet Chair in European Politics and Head of School of Social Sciences University of Manchester and Alfio Mastropaolo University of Turin The series is published in association with the European Consortium for Political Research
