Portrait Of The Family Within The Total Economy

Peter Saunders

Portrait Of The Family Within The Total Economy:

Portrait of the Family Within the Total Economy Graeme Donald Snooks, 1994-07-18 The household sector is the forgotten economy of the Western world Yet it is an institution that has always played a central role in the operation of economic systems and in the way these systems have changed through time This book which focuses on the Australian case looks at the role of the household economy in the process of economic change It considers the household within the context of the total economy and also identifies and analyses longrun dynamic processes in Western society since the Industrial Revolution This is the first attempt to analyse the dynamics of the total economy over such a long period of time Soundly based on new estimates of household and market economic activity for Australia the book challenges accepted theoretical and empirical notions in this area Professor Snooks pioneering book makes an important contribution to economics economic measurement and economic history

Rebellious Families Jan Kok, 2002-12-01 Why do people rebel This is one of the most important questions historians and social scientists have been grappling with over the years It is a question to which no satisfactory answer has been found despite more than a century of research However in most cases the research has focused on what people do if they rebel but hardly ever why they rebel The essays in this volume offer an alternative perspective based on the question at what point families decided to add collective action to their repertoires of survival strategies In this way this volume opens up a promising new field of historical research the intersection of labour and family history The authors offer fascinating case studies in several countries spanning over four continents during the last two centuries In an extensive introduction the relevant literature on households and collective action is discussed and the volume is rounded off by a conclusion that provides methodological and theoretical suggestions for the further exploration of this new field in social history

Fathering Alistair Thomson, 2025-08-13 The 21st century father is expected to be actively engaged in the everyday care of his children as epitomised by the celebrated dad of children s cartoon Bluey the Blue Heeler Bandit *Fathering An Australian History* explores why men often struggle to meet social and cultural expectations The authors groundbreaking research reveals the forces that have shaped Australian family life and fathering since the early twentieth century and how Australian fathers have managed the evolving role and its responsibilities Focusing on lived experience and drawing upon a century of personal accounts *Fathering* shows how fathers have participated in raising their children as the world changed their family roles and the relationships they form with their children It reveals how the experience of being a father is as much shaped by social class and material wellbeing as it is by race and ethnicity geography and sexuality and by family legacy and personal character The first comprehensive history of Australian fathering *Fathering* transforms our understanding of men s experience of parenthood showing how fathers from diverse backgrounds including migrant and Indigenous dads have negotiated their role in changing circumstances

Australian Economic History Claire E. F. Wright, 2022-06-02 In a time of pandemics war and climate change fostering knowledge that transcends disciplinary

boundaries is more important than ever Economic history is one of the world's oldest interdisciplinary fields with its prosperity dependent on connection and relevance to disciplinary behemoths economics and history Australian Economic History is the first history of an interdisciplinary field in Australia and the first to set the field's progress within the structures of Australian universities It highlights the lived experience of doing interdisciplinary research and how scholars have navigated the opportunities and challenges of this form of knowledge These lessons are vital for those seeking to develop robust interdisciplinary conversations now and in the future This previously untold story of economic history in Australia exposes the centrality of economic thought and scholarship to Australian intellectual and political life Deftly positioning economic history in an innovative institutional place based and person focused narrative Claire Wright entangles economics with the history of education to produce a tale of university interdisciplinarity influence and impact Written with vitality and bursting with both data and anecdote this book makes an exceptional contribution to the intersecting fields of history economics and higher education studies Hannah Forsyth author of *A History of the Modern Australian University* Few readers would expect to find a classical tragedy in the story of an academic field Yet that is what Claire Wright shows us in this study of Economic History as it has been practiced in Australia She traces the field from legendary beginnings to triumphant growth to organisational collapse and renaissance on other terms Carefully researched and vigorously written this book raises questions about disciplines and interdisciplinary fields universities and markets and social bases of intellectual work that are relevant to all fields today Raewyn Connell author of *The Good University Australia* proved a pioneer in the study of economic history nurturing a discipline with innovative data and understanding of material trends Yet by the 1990s economic history departments closed as senior scholars retired and the field was subsumed by conventional economics In this absorbing study Dr Claire Wright challenges the conventional account She is tough minded about financial and institutional pressures on the field but cautiously optimistic about the future It is a mistake she argues to see institutional representation as the benchmark of influence Instead the interdisciplinary nature of economic history has encouraged new research and teaching across the humanities and social sciences With close attention to individual scholars and their university departments and a deep sense of the trajectory of the field *Australian Economic History Transformations of an Interdisciplinary Field* is an original and important contribution to Australian intellectual history Glyn Davis Distinguished Professor of Political Science in the Crawford School of Public Policy The Australian National University

Social Security Journal, 1994 *The Ends and Means of Welfare* Peter Saunders, 2002-08-13 This book first published in 2002 explores the relation between economic liberalism and social policy in Australia *The Laws of History* Graeme Snooks, 2002-09-26 In this unorthodox and trail blazing work Graeme Snooks argues that it is possible to construct a scientific theory of human history but only if we adopt a radically materialist theory of human nature *Labour and Leisure in Historical Perspective, Thirteenth-twentieth Centuries* Ian Blanchard, Wray Vamplew, 1994 **Foucault and Family**

Relations Malcolm Voyce, 2019-05-14 Foucault and Family Relations Governing from a Distance in Australia analyzes how notions of property ownership were instrumental in maintaining family stability and continuity in rural Australia outlining how inheritance and divorce laws functioned to govern the internal relationships of families to assist the state to rule from a distance Using a selection of Foucault's ideas on the family sexuality race space and economics this book shows how property operated as a disciplinary device which was underpinned by technical ideas such as surveying and cartography This book uses legal judgments as a form of ethnography to show how property as a socio technical device allowed a degree of local freedom for owners This aspect of property allowed the state to stimulate ideas of local freedom to assist in ruling from a distance demonstrating how the rural family as a domestic unit became a key field of intervention for the state as the family represented a bridge to larger relationships of power

The Experience of Middle Australia Michael Pusey, 2003-06-23 This book puts middle Australia under the microscope examining how quality of life is faring in the face of change and uncertainty 400 Australians from around the country shared their experiences of work family and community for this book creating a striking picture of Australian society into a new millennium This lived experience is set against hard data so that we can truly understand the impact good and bad of economic restructuring on the broad Australian middle class Meticulously researched it mounts a moral and intellectual counter argument to economic reform A sequel to the best selling Economic Rationalism in Canberra Michael Pusey's book will be equally important

When somebody should go to the books stores, search opening by shop, shelf by shelf, it is in reality problematic. This is why we present the ebook compilations in this website. It will unconditionally ease you to see guide **Portrait Of The Family Within The Total Economy** as you such as.

By searching the title, publisher, or authors of guide you in point of fact want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best area within net connections.
