Quiet Politics and Business Power. Corporate Control in Europe and Japan

The politics that drive corporate governance (CG) reforms in industrialised countries have become an important topic in comparative politics and political economy at least since Mark Roe's seminal book (Roe 2003). He develops the thesis that insider-orientated corporate governance systems, where large shareholders have close ties with managers and monitor them directly, emerge as an investor reaction to strong social democratic parties. Social democratic power explains hence cross-national differences in corporate governance. John W. Cioffi and Martin Höpner's (2006) proposed a 'partisan' theory based on the 'political paradox of finance capitalism', which states that – contrary to Roe's claim – in many countries during the 1990s social democratic parties were the driving force of shareholder-orientated reforms. Social democratic power favoured hence the emergence of outsider CG systems, which are characterised by the absence of large shareholders, the disciplining of corporate insiders by (financial) markets and the existence of hostile takeovers. 'Coalitional approaches', constitute a third group of theories, which consider that coalitions between *interest groups* representing labour, capital and managers, not political parties, explain a given corporate governance outcome (Gourevitch & Shinn 2005).

Two recent books, by John W. Cioffi and Pepper Culpepper respectively, make important contributions to this ongoing debate about what political factors determine different structures of corporate control across countries. Both books explicitly address recent research on institutional change in comparative political economy; in particular theories of institutional change as rule-taker driven and incremental processes (Streeck & Thelen 2005; Mahony & Thelen 2010). However, the two books contribute in quite different ways to this literature.

Cioffi's main contribution is to draw our attention to the increasing importance of 'regulatory politics' in an era where legal rules become more and more. He focuses therefore on top-down – i.e. rule-maker driven – processes of institutional change, which have recently been somewhat marginalized in favour of bottom-up processes.

Culpepper on the other hand takes the precise opposite view, reaffirming the importance of not only considering formal legal rules (formal institutions), but also informal institutions in order to fully understand the politics of corporate governance.

The books use hence two fundamentally different approaches. Yet, they reach in part quite similar conclusions. Importantly, both authors rehabilitate in some sense out-of-favour 'punctuated equilibrium' concepts of institutional change underscoring the importance of periodic crises in making quite radical change possible (Cioffi 2010: 137; Culpepper

Economic Analysis of Law in China Thomas Eger, Michael G. Faure, Naigen Zhang, 2007-01-01 This book is an exemplary multi disciplinary and multi institutional study of contemporary Chinese law A collective effort by a group of European and Chinese scholars it skillfully tests the relationships between law and economics in the Chinese context The China Journal This is an extremely valuable collection of essays on modern Chinese law viewed through the lens of the law and economics movement China is developing very rapidly and law is now understood to provide the essential framework for economic development provided the law itself is economically rational The essays in this volume are excellent examples of how economics can be used to clarify and guide the law applicable to the essential dimensions of the economy I recommend it wholeheartedly and without reservations Richard A Posner United States Court of Appeals for the Seventh Circuit and University of Chicago Law School US This book brings together important applications of law and economics to China and covers a wide range of issues including such basic concerns as property rights intellectual property and taxation as well as competition law and corporate and securities law Because of its breadth of coverage its focus on the particulars of Chinese law and the expertise of its scholars both Western and Chinese it should serve as a valuable reference work for years to come Steven Shavell Harvard Law School US This book is an important step toward a Chinese scholarship in law and economics written by leading law and economics researchers from China and Europe Hans Bernd Schaefer Universit t Hamburg Germany In China everything is different you cannot apply ordinary economics and the legal framework is idiosyncratic In the course of time such statements turned out to be prejudices and the Eger Faure Zhang volume makes perfectly clear that for instance a law and economics approach can shed new light into the intricacies and complexities of Chinese institutional arrangements Indeed China creates new puzzles for economic and legal analysis On the other hand however the Chinese need not invent the wheel anew and they do not try it The book shows instances where a sophisticated law and economics approach can help to develop the legal framework which is appropriate for the transition from a planned into a market economy The Chinese economic system is not yet a normal capitalist market economy neither is the legal system adapted to a normal private property economy Nevertheless the chapters of the book apply fruitfully law and economics theories and thus prove their general applicability One of the outstanding achievements of the volume can be seen in the fact that it recruited more than half of its contributors with a Chinese background They learn eagerly western

Metropolitan Regions, Planning and Governance Karsten Zimmermann, Daniel Galland, John Harrison, 2019-10-24

The aim of this book is to investigate contemporary processes of metropolitan change and approaches to planning and governing metropolitan regions. To do so it focuses on four central tenets of metropolitan change in terms of planning and governance: institutional approaches, policy mobilities, spatial imaginaries and planning styles. The book's main contribution lies in providing readers with a new conceptual and analytical framework for researching contemporary dynamics in metropolitan regions. It will chiefly benefit researchers and students in planning, urban studies, policy and governance studies, especially those interested in metropolitan regions. The relentless pace of urban change in globalization poses fundamental questions about how to best plan and govern 21st century metropolitan regions. The problem for metropolitan regions, especially for those with policy and decision making responsibilities, is a growing recognition that these spaces are typically reliant on inadequate urban economic infrastructure and fragmented planning and governance arrangements. Moreover, as the demand for more appropriate i.e. more flexible, networked and smart forms of planning and governance increases, new expressions of territorial cooperation and conflict are emerging around issues and agendas of development, infrastructure expansion and the collective provision of services.

State Structure, Policy Formation, and Economic Development in Southeast Asia Antoinette R. Raquiza, 2013-06-17 Why do some small developing countries industrialize and others don't? What factors account for different economic performance among states that are vulnerable to external shocks, crony capitalism and political instability? This book argues that the answer lies in the structuring of state power, specifically the way different sets of governing elites, political leaders and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each other in the economic development policy process. Conducting a comparative historical analysis of Thailand and the Philippines, the book argues that the institutional settings of governing elites influence economic outcomes. In Thailand, political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long term industrial activities. In contrast, Philippine state power derives from family networks that merge social and political power suited to fast moving short term commercial interests. In focusing on this political and institutional story, the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes, dependency and social conflict and how they are likely to develop in the future.
