Right To Useful Work:

A System of Rights Rex Martin, 1993 The justification of political authority is one of the long standing issues of political philosophy and one which persistently defies satisfactory solution This book sets out to provide an original justification by establishing a background framework for dealing with this problem The model political system that emerges is one in which certain kinds of political rights are emphasized Rex Martin then discusses what the implications of such a system might be for democratic institutions political allegiance punishment and ultimately for the nature of political authority itself

Prisoners' Rights John Kleinig, 2017-07-05 This volume brings together a selection of the most important published research articles from the ongoing debate about the moral rights of prisoners The articles consider the moral underpinnings of the debate and include framework discussions for a theory of prisoners rights as well as several international documents which detail the rights of prisoners including women prisoners Finally detailed analysis of the moral bases for particular rights relating to prison conditions covers areas such as health solitary confinement recreation work religious observance library access the use of prisoners in research and the disenfranchisement of prisoners

Modern Thermodynamics for Chemists and Biochemists Dennis Sherwood, Paul Dalby, 2018-05-11 Thermodynamics is fundamental to university and college curricula in chemistry physics engineering and many life sciences around the world It is also notoriously difficult for students to understand learn and apply What makes this book different and special is the clarity of the text The writing style is fluid natural and lucid and everything is explained in a logical and transparent manner Thermodynamics is a deep and important branch of science and this book does not make it easy But it does make it intelligible This book introduces a new Fourth Law of Thermodynamics based on the notion of Gibbs free energy which underpins almost every application of thermodynamics and which the authors claim is worthy of recognition as a law The last four chapters bring thermodynamics into the twenty first century dealing with bioenergetics how living systems capture and use free energy macromolecule assembly how proteins fold and macromolecular aggregation how for example virus capsids assemble This is of great current relevance to students of biochemistry biochemical engineering and pharmacy and is covered in very few other texts on thermodynamics The book also contains many novel and effective examples such as the explanation of why friction is irreversible the proof of the depression of the freezing point and the explanation of the biochemical standard state

The Universal Declaration of Human Rights Johannes Morsink, 2010-08-03 Selected by Choice magazine as an Outstanding Academic Book for 1999 Born of a shared revulsion against the horrors of the Holocaust the Universal Declaration of Human Rights has become the single most important statement of international ethics It was inspired by and reflects the full scope of President Franklin Roosevelt's famous four freedoms the freedom of speech and expression the freedom of worship the freedom from want and the freedom from fear Written by a UN commission led by Eleanor Roosevelt and adopted in 1948 the Declaration has become the moral backbone of more than two hundred human rights instruments that are now a part of our

world The result of a truly international negotiating process the document has been a source of hope and inspiration to thousands of groups and millions of oppressed individuals *The Right to Work* Virginia Mantouvalou, 2015-01-22 The value of work cannot be underestimated in today's world Work is valuable because productive labour generates goods needed for survival such as food and housing goods needed for self development such as education and culture and other material goods that people wish to have in order to live a fulfilling life A job also generally inspires a sense of achievement self esteem and the esteem of others People develop social relations at work which can be very important for them Work brings both material and non material benefits There is no doubt that work is a crucial good Do we have a human right to this good What is the content of the right Does it impose a duty on governments to promote full employment Does it entail an obligation to protect decent work There is also a question about the right holders Do migrants have a right to work for example At the same time many people would rather not work What kind of right is this if many people do not want to have it The chapters of this book address the uncertainty and controversy that surround the right to work both in theoretical scholarship and in policymaking They discuss the philosophical underpinnings of the right to work and its development in human rights law at national level in jurisdictions such as the United Kingdom Australia Japan France and the United States and international level in the context of the United Nations the European Social Charter the International Labour Organization the European Convention on Human Rights and other legal orders

Democratic Socialism and the Cost of Defence Mary Kaldor, Dan Smith, Steve Vines, 2018-12-07 First published in 1979 The report of the Labour Party Defence Study Group which met from early 1975 to mid 1977 represents a unique attempt to portray defence policy in the context of disarmament and the need to restructure and control the institutions of defence in particular the defence industry The report presented the fullest study made by any British political party concerning the implications and consequences of its stated defence policy and embodied an examination of defence from the perspective of approaches of disarmament At the same time the search for a new policy in international relations was harmonised with the further development of a new industrial strategy concentrating upon the potential for converting part of military industry to civil work This work which presents a distinctive intervention in the general debate concerning defence policy industrial and technological planning economic priorities and public policy will be of considerable relevance to both specialists in each of these fields as well as the general reader
