Rights The New Quarrel Between The Ancients And The Moderns:

Refractions of Violence Martin Jay, 2013-10-08 A new collection of essays by the internationally recognized cultural critic and intellectual historian Martin Jay that revolves around the themes of violence and visibility with essays on the Holocaust and virtual reality religious violence the art world and the Unicorn Killer among a wide range of other topics

Reinterpreting the Political Lenore Langsdorf, Stephen H. Watson, Karen A. Smith, 1998-07-10 Rereads classical figures in continental thought takes up current topics in the legacy of political theory and analyzes and evaluates Foucault's work as a prime manifestation of the complicated modern interface between truth and power institution and liberation *Reading*

Leo Strauss Steven B. Smith, 2007-03-01 Interest in Leo Strauss is greater now than at any time since his death mostly because of the purported link between his thought and the political movement known as neoconservatism Steven B. Smith though surprisingly depicts Strauss not as the high priest of neoconservatism but as a friend of liberal democracy perhaps the best defender democracy has ever had Moreover in *Reading Leo Strauss* Smith shows that Strauss's defense of liberal democracy was closely connected to his skepticism of both the extreme Left and extreme Right Smith asserts that this philosophical skepticism defined Strauss's thought It was as a skeptic Smith argues that Strauss considered the seemingly irreconcilable conflict between reason and revelation a conflict Strauss dubbed the theologico-political problem Calling this problem the theme of my investigations Strauss asked the same fundamental question throughout his life what is the relation of the political order to revelation in general and Judaism in particular Smith organizes his book with this question first addressing Strauss's views on religion and then examining his thought on philosophical and political issues In his investigation of these philosophical and political issues Smith assesses Strauss's attempt to direct the teaching of political science away from the examination of mass behavior and interest group politics and toward the study of the philosophical principles on which politics are based With his provocative lucid essays Smith goes a long way toward establishing a distinctive form of Straussian liberalism

Inheritance Law and Political Theology in Shakespeare and Milton Joseph S. Jenkins, 2016-05-23 *Reading God's will and a man's Last Will* as ideas that reinforce one another this study shows the relevance of England's early modern crisis regarding faith in the will of God to current debates by legal academics on the theory of property and its succession The increasing power of the dead under law in the US the UK and beyond a concern of recent volumes in law and social sciences is here addressed through a distinctive approach based on law and humanities Vividly treating literary and biblical battles of will the book suggests approaches to legal constitution informed by these dramas and by English legal history This study investigates correlations between the will of God in Judeo-Christian traditions and the Last Wills of humans especially dominant males in cultures where these traditions have developed It is interdisciplinary in the sense that it engages with the limits of several fields it is informed by humanities critical theory especially Benjaminian historical materialism and Lacanian psychoanalysis but refrains from detailed theoretical

considerations Dramatic narratives from the Bible Shakespeare and Milton are read as suggesting real possibilities for alternative inheritance i.e. constitutional regimes As Jenkins shows these texts propose ways to alleviate violence violence both personal and political through attention to inheritance law Hannah Arendt and Human Rights Peg Birmingham, 2006-09-29 Hannah Arendt's most important contribution to political thought may be her well known and often cited notion of the right to have rights In this incisive and wide ranging book Peg Birmingham explores the theoretical and social foundations of Arendt's philosophy on human rights Devoting special consideration to questions and issues surrounding Arendt's ideas of common humanity human responsibility and natality Birmingham formulates a more complex view of how these basic concepts support Arendt's theory of human rights Birmingham considers Arendt's key philosophical works along with her literary writings especially those on Walter Benjamin and Franz Kafka to reveal the extent of Arendt's commitment to humanity even as violence horror and pessimism overtook Europe during World War II and its aftermath This current and lively book makes a significant contribution to philosophy political science and European intellectual history

In the third and final volume of this series we examine the implications of the accelerating globalization process for the nation state Are globalization the rise of regional and international institutions and the international agreements on human rights actually reducing and transforming state sovereignty Clearly ethnic racial and religious identities remain salient but how do they correspond to intersect with and overflow continuous nation state spaces that are demarcated by legally recognized borders In what conditions do democratic state building projects actually enhance political civil and social rights and when do they tend to contribute to the consolidation of elite power Should democratic forces put their faith in a cosmopolitan vision of global citizenship especially when they tackle quintessentially international and transnational problems like peace aboriginal rights and the protection of the environment In this volume's collection of contemporary political sociologists key articles we present work that explores the exposure of the nation state and the post World War II world system to global forces **Confronting Mass Democracy and Industrial Technology** John P. McCormick, 2002 With a groundbreaking interdisciplinary approach to German political and social theory *Confronting Mass Democracy and Industrial Technology* provides fresh insight into the thought of many of the most influential intellectual figures of the twentieth century Its essays detail the manner in which a wide range of German intellectuals grappled with the ramifications and implications of democracy technology knowledge and control from the late Kaiserreich to the Weimar Republic from the Third Reich and the Federal Republic through recently unified Germany Scholars representing the fields of political science

philosophy history law literature and cultural studies devote essays to the work of Nietzsche Weber Heidegger Lukacs Schmitt Marcuse Adorno and Habermas They also discuss the writings of such figures as Brecht and Freud who are not primarily thought of as political theorists and explore the thought of Helmut Plessner and reformist theorists from East Germany who have been little studied in the English language In the process of debating the nature and responsibilities of the modern state in an era of mass politics unparalleled military technology capacity for surveillance and global media presence the contributors question whether technology is best understood as an instrument of human design and collective control or as an autonomous entity that not only has a will and life of its own but one that forms the very fabric of modern humanity Contributors Seyla Benhabib Richard J Bernstein Peter C Caldwell Richard Dienst David Dyzenhaus Andrew Feenberg Nancy S Love John P McCormick Jan Werner Müller Gia Pascarelli William E Scheuerman Steven B Smith Tracy B Strong Richard Wolin

Turner, 2023-10-13 The Rise and Fall of Citizenship brings together many of Turner's publications on the topic of citizenship and includes three new chapters reflecting upon conceptions of citizenship today The collection begins with a newly written overview of the rise of social citizenship with particular reference to the UK and the US from 1945 to the 1980s which charts the experiences of the Baby Boomers that benefited from the creation of welfare states post war reconstruction and the commitment to full employment The core chapters are based on previously published articles primarily from Taylor Francis Citizenship Studies journal These chapters examine and critique various sociological and political theories of citizenship and social rights as expounded in the works of R H Tawney J M Keynes T H Marshall Ralf Dahrendorf Judith Shklar Peter Townsend Bernard Crick and Jürgen Habermas among others Later chapters bring the concept of citizenship up to date Since the 1980s the UK and the US have been radically altered by neoliberal economic policies involving the deindustrialization of capitalism and an emphasis on financial institutions which have given rise to new patterns of inequality and changing labour markets In describing where we are now Turner argues that new forms of employment instability and uncertainty are captured by the idea of the precariat and that citizens now experience their social world as if they were denizens Turner also considers the impact of demographic changes and increased immigration widely opposed by populist parties on conceptions of citizenship Migration and membership are also examined with reference to issues of dual citizenship permanent residence and citizenship for cash The final chapter considers the ongoing relevance of the ancient law of hospitality positing how the migrant can be considered as an asset rather than a threat This wide ranging and thought provoking collection will be of interest to scholars and students in the humanities and social sciences with a

focus on citizenship and rights
