Rise Of Free Trade Imperialism The Empire Of Free Trade And Imperialism 1750 185:

The Rise of Free Trade Imperialism Bernard Semmel, 2004-02-05 The Rise of Free Trade Imperialism seeks to uncover some of the intellectual origins of the imperialism of the classic period the sources from which later theories of imperialism were constructed and the character of the ideology which underlay the dismantling of the old colonial system and the construction of the Victorian Pax Britannica The author discusses the development and diffusion of a number of the central arguments of the science of political economy from the standpoint of a historian rather than an economist which were crucial not only to the construction of theories of capitalist imperialism but also served as a spur both to efforts at colonization and to establishing a British Workshop of the World

The Rise of Free Trade Imperialism Bernard Semmel, 1978

The Emergence of Capitalism in Early America Christopher W. Calvo, 2020-02-03 Due to the enormous influence of Adam Smith's *The Wealth of Nations* on Western liberal economics a tradition closely linked to the United States many scholars assume that early American economists were committed to Smith's ideas of free trade and small government Debunking this belief Christopher W. Calvo provides a comprehensive history of the nation's economic thought from 1790 to 1860 tracing the development of a uniquely American understanding of capitalism *The Emergence of Capitalism in Early America* shows how American economists challenged adjusted and adopted the ideas of European thinkers such as Adam Smith David Ricardo and Thomas Malthus to suit their particular interests Calvo not only explains the divisions between American free trade and the version put forward by Smith but he also discusses the sharp differences between northern and southern liberal economists Emergent capitalism fostered a dynamic discourse in early America including a homegrown version of socialism burgeoning in antebellum industrial quarters as well as a reactionary brand of conservative economic thought circulating on slave plantations across the Old South This volume also traces the origins and rise of nineteenth century protectionism a system that Calvo views as the most authentic expression of American political economy Finally Calvo examines early Americans awkward relationship with capitalism's most complex institution finance Grounded in the economic debates Atlantic conversations political milieu and material realities of the antebellum era this book demonstrates that American thinkers fused different economic models assumptions and interests into a unique hybrid capitalist system that shaped the trajectory of the nation's economy

Politics and Trade in Britain, 1776-1914 Gordon Bannerman, 2023-07-27 This volume explores the period between Smith's 1776 *The Wealth of Nations* and ends in the early days of the Anti Corn Law League campaign on the eve of the 1841 General Election which prominently featured contrasting commercial policy options between Conservative and Liberal parties During this period we witness the growth of free trade sentiment with opposition to monopolies like the old Chartered Companies and attempts to create more liberal bilateral commercial treaties Most importantly we see the imposition of the protectionist Corn Laws in 1815 at the behest of a Parliament largely based on the landed interest Between 1815 and 1846 the Corn Laws become the fulcrum of the entire debate on commercial policy the

keystone in the arch of the protective system and slowly divisions begin to emerge throughout society and between the political parties culminating in the formation of the Anti Corn Law League and their attempt to influence politics via pressure from without The sources include printed matter such as the diaries of Lord Colchester various parliamentary papers on commercial policy printed correspondence of William Pitt Lord Melbourne Joseph Sturge periodical literature from numerous sources such as the Eclectic Review and The Oriental Herald Also included is a considerable body of newspaper material from the Manchester Times Dundee Advertiser and The Chartist reflective of the growing importance of the provinces and manufacturing interests in commercial and local and national politics

Henry Goulburn, 1784-1856

Brian Jenkins,1996-03-14 Between 1812 and 1821 Goulburn worked in the War and Colonial Office where he effectively administered Britain's far flung possessions Appointed chief secretary for Ireland in 1821 a Protestant to offset a Catholic viceroy Goulburn was at the heart of the final rearguard action by the opponents of Catholic emancipation As chancellor of the exchequer for the Duke of Wellington 1828-30 and Sir Robert Peel 1841-46 he participated in such momentous decisions as Catholic emancipation and the repeal of the Corn Laws An opponent of parliamentary reform he worked closely with Peel his lifelong friend to build the Conservative Party and served as a parliamentary champion of the Established Church Jenkins examines the conservative values Goulburn held and the moral dilemma of an essentially good man who depended on the institution of slavery for his private income A modest man and a loyal lieutenant Goulburn himself allowed that he had been content to walk in the shadow of political giants This self effacement helps account for the lack of wide recognition generally given him but does not detract from his significant contribution to British history Henry Goulburn accords a remarkable politician his rightful place

The Political Economy of Mercantilism

Lars Magnusson,2015-06-12 Since the days of Adam Smith Mercantilism has been a hotly debated issue Condemned at the end of the 18th century as a false system of economic thinking and political practice it has returned paradoxically to the forefront in regard to issues such as the creation of economic growth in developing countries This concept is often used in order to depict economic thinking and economic policy in early modern Europe its meaning and content has been highly debated for over two hundred years Following on from his 1994 volume Mercantilism The Shaping of an Economic Language this new book from Lars Magnusson presents a more synthetic interpretation of Mercantilism not only as a theoretical system but also as a system of political economy This book incorporates samples of material from the 1994 publication alongside new material ordered in a new set of chapters and up date discussions on mercantilism up to the present day Tracing the development of a particular political economy of Mercantilism in a period of nascent state making in Western and Continental Europe from the 16th to the 18th century the book describes how European rulers regarded foreign trade and industrialisation as a means to achieve power and influence amidst international competition over trades and markets Returning to debates concerning whether Mercantilism was a system of power or of wealth Magnusson argues that it is in fact was both and that contemporaries almost without exception

saw these goals as interconnected He also emphasises that Mercantilism was an all European issue in a time of trade wars and the struggle for international power and recognition In examining these issues this book offers an unrivalled modern synthesis of Mercantilist ideas and practices **The Material of World History** Tina Mai Chen,David S.

Churchill,2015-03-27 This volume considers the confluence of World History and historical materialism with the following guiding question in mind given developments in the field of historical materialism concerned with the intersection of race gender labour and class why is it that within the field of World History historical materialism has been marginalized precisely as World History orients toward transnational socio cultural phenomenon micro studies or global histories of networks Answering this question requires thinking in an inter related manner about both the development of World History as a discipline and the place of economic determinism in historical materialism This book takes the position that historical materialism as applied to the field of World History needs to be more open to the methodological diversity of the materialist tradition and to refuse narrowly deterministic frameworks that have led to marginalization of materialist cultural analysis in studies of global capitalism At the same time World History needs to be more self critical of the methodological diversity it has welcomed through a largely inclusionary framework that allows the material to be considered separately from cultural social and intellectual dimensions of global processes **Compound Containment** Dong Jung Kim,2022-03-07

When does a reigning great power of the international system supplement military containment of a challenging power by restricting its economic exchanges with that state Scholars of great power politics have traditionally focused on examining a reigning power s military containment of a challenging power In direct contrast Compound Containment demonstrates that these conventional studies are flawed without a sound understanding of the multilayered aspects of containment strategy in great power politics Since economic capacity and military power are intimately linked to one another countering a challenging power requires addressing both economic and military dimensions Nonetheless this nexus of security and economy in a reigning power s response to a challenging power cannot be explained by traditional theories that dominate research in international security Author Dong Jung Kim fills a gap in the scholarship on great power competition by investigating when a reigning power will make its military containment of a challenging power compound by simultaneously employing restrictive economic measures Its main theoretical claims are corroborated by an analysis of key historical cases of reigning power challenging power competition This book also offers policy prescriptions for the United States by examining whether the United States is in a position to complement military containment of China with restrictive economic measures

Concepts for International Law Jean d'Aspremont,Sahib Singh, Concepts shape how we understand and participate in international legal affairs They are an important site for order struggle and change This comprehensive and authoritative volume introduces a large number of concepts that have shaped at various points in history international legal practice and thought intimates at how the many projects of international law have grappled with and influenced the world through certain

concepts and introduces new concepts into the discipline **The Expansion of England** Bill Schwarz, 2005-08-04 The organized study of history began in Britain when the Empire was at its height Belief in the destiny of imperial England profoundly shaped the imagination of the first generation of professional historians But with the Empire ended do these mental habits still haunt historical explanation Drawing on postcolonial theory in a lively mix of historical and theoretical chapters *The Expansion of England* explores the history of the British Empire and the practice of historical enquiry itself There are essays on Asia Australasia the West Indies South Africa and Britain Examining the sexual racial and ethnic identities shaping the experiences of English men and women in the nineteenth century the authors argue that habits of thought forged in the Empire still give meaning to English identities today
