School Library Journal , 2004 *Governance, Growth and Global Leadership* Dr Espen Moe, 2013-06-28 This book focuses on the role of the state in promoting a country s long term technological progress and industrial leadership Throughout history a nation s rise to dominance has invariably been followed by its fall the dominant powers of today are not the same ones that controlled the world three hundred years ago In the same manner economic dominance has usually been fleeting as leading nations have routinely been caught up and surpassed by challengers This study looks at Schumpeterian growth currently the most important source of economic growth which credits the ability to use technological progress for the benefit of industrial leadership as the key motor of national development and economic success Contrasting the experiences of five great powers Britain France Germany the USA and Japan during five periods of technological and industrial leadership from the Industrial Revolution to the beginning of the twenty first century the book draws on historical and comparative methods to draw causal inferences about international progress and leadership It explores various factors that promote or hinder technological advancement and how these can in turn effect national development It concludes that where states have forged ahead and maintained a lead over their rivals it is because consensus and cohesion prevented vested interests from growing powerful enough to block structural economic change By applying economic theory to long term historical models this book offers a fascinating perspective on the causes and effects of national growth and industrial leadership It will be invaluable reading for anyone with an interest in international relations and global economic trends both modern and historical *The British National Bibliography* Arthur James Wells, 2006 **The Emergence of Literary**

Criticism in 18th-Century Britain Sebastian Domsch, 2014-08-19 This study tries through a systematic and historical analysis of the concept of critical authority to write a history of literary criticism from the end of the 17th to the end of the 18th century that not only takes the discursive construction of its self representation into account but also the social and economic conditions of its practice It tries to consider the whole of the critical discourse on literature and criticism in the time period covered Thus it is distinctive through its methodology there is no systematic account of the historical development of critical authority and no discussion of the institutionalization of criticism of such a scope its material of analysis most of the many hundred texts self reflexively commenting on criticism that are discussed here have been so far virtually ignored and through its results a complex history of criticism in the 18th century that is neither reductive nor the accumulation of isolated aspects or author figures but that probes into the very nature of the activity of criticism The aim of this study is both to provide a thorough historical understanding of the emergence of criticism and as a consequence an understanding of the inner workings and power relations that structure criticism to this day
