Risking Old Age In America Richard J. Margolis, 2019-06-18 Originally published in 1990 Research into the provision made for the 30 million Americans aged sixty five and up whom society calls old *The New Politics of Old Age Policy* Robert B. Hudson, 2005 The successor to Robert Hudson's *The Future of Age Based Public Policy* this volume offers a variety of perspectives on these policy issues that directly effect America's aging population particularly the relative merits of using chronological age to determine eligibility for government programs *Aging and Adult Development in the Developing World* Frank E. Eyetsemitan, James T. Gire, 2003-02-28 Most studies of human development in developing societies have focused on the childhood stage and in a few cases exploration has extended up to adolescence since this age group represents about half the population in developing societies The developed world however is experiencing a surge in the elderly population and this has spurred its study There is growing recognition that studies are needed in order to understand aging in all contexts and to discover how the experience may differ in developing and developed societies In this book the authors discuss the appropriateness or inappropriateness of applying Western theories and perspectives to studies of aging in the developing world The present study critically examines the major theories in the area of aging and adult development covering such domains as the physical psychological and social aspects of aging death and dying and social and public policies Applying the concepts of individualism and collectivism as well as the global and environmental dimensions of the developing world the authors have earmarked the theories that seem suitable only to the developed world and those that appear to be universally relevant ***Aging, Social Inequality, and Public Policy*** Fred C. Pampel, 1998-02-25 Author Fred C. Pampel treats age as a component of social inequality which gives rise to the three major themes of the text diversity in the experience of individuals differences in public policy and variations across nations Comparison of the United States with other nations is a central component of the book providing a greater understanding of the larger forces that shape old age *Services to the Aging and Aged* Paul K. Kim, 2021-03-04 This series attempts to address the topic of aging from a wide variety of perspectives and to make available some of the best gerontological thought and writings to researchers professional practitioners and students in the field of aging as well as in other related areas This volume is an invaluable resource for those persons seeking a broad comprehensive coverage of current public policies and service programs for the elderly Besides dealing with present gerontological services it also explores the emerging challenges that these services must face in the future One of the outstanding features of the book is that its contributors include some of the most prominent authorities in the field of gerontology This is an exceptionally important and timely volume and is a much needed addition to the literature on aging *Remainder of Their Days* Carolyn J.
