Women and AIDS Ellen Cole, Esther D Rothblum, Linda K Fuller, Nancy Roth, 2014-01-14 For many women the advice Use a condom is not enough to help protect them from HIV infection As Women and AIDS reveals negotiating safer sex practices is a very complex issue for women who are involved in relationships where they do not enjoy physical social or economic equality The book's authors maintain that the key to curbing the spread of HIV and to caring for those already infected is communication Women and AIDS is the first volume to address HIV AIDS and women from a communication perspective This helpful guidebook addresses how women might achieve safer sexual and drug injection practices with

partners but it also explores women's negotiation of the health care system as patients, medical research subjects and caregivers. It challenges traditional assumptions about the relationship between care providers and patients and the meaning of patient compliance and raises important questions about gender, race and class that are exacerbated by the epidemic. Designed to ground interventions in the realities of women's lives, *Women and AIDS* discusses what women can do to get around communication and health care obstacles. To this end, you will learn about using the media for HIV-related social action and to promote women's views of HIV and sexuality, prison health care for HIV-positive women, cultural constructions of sex and drug sharing in a variety of communities, long-term changes that will empower women, delivering an HIV-positive diagnosis to patients, gender roles and caregiving, the language we use to talk about Third World women and Asian AIDS, women AIDS filmmakers, videographers. For the benefit of AIDS activists, health care providers and counselors, *Women and AIDS* discusses women and their communication and awareness from virtually every angle. This book analyzes situations where communication breaks down, from the woman who can't openly discuss safe sex with her partner to the drunk college student who hooks up to the doctor who gives an HIV-positive diagnosis without compassion and offers communication solutions. This will help women avoid such risks, establish communication and safety in their lives and construct meaningful roles in relationship to HIV/AIDS.

Crisis Counseling For A Quality School Larry Palmatier, 2013-10-08 The theory of crisis counselling put forward in this book is applied to the following situations: drug and alcohol abuse, depression and suicide, physical and sexual abuse, social and discipline problems, lateness, encopresis and enuresis, fear, tearfulness, inactivity, fury and impulsiveness, violence and conflicts, children of divorced and foster families, loss and grief, war and disasters, parents in crisis, homelessness, crack kids and AIDS children and defiance, inter-racial tensions and cross-cultural conflicts.

Teaching AIDS Douglas Tonks, 2012-11-12 *Teaching AIDS* begins with a discussion of how teachers can create an environment of support for an AIDS education programme. Recognizing that AIDS education must differ for students of different age groups, the author presents tailored, age-appropriate content, what and how teachers should communicate AIDS information to young children, older children and teenage students. *Teaching AIDS* also addresses actual methods teachers can use to influence their students' attitudes and behaviour by helping them to recognize problem situations in which risks might arise and presenting them with the actual skills they need to protect themselves in such situations.
