DIGITALIZATION, METAVERSE, ARTIFICIAL INTELLIGENCE IN THE CONTEXT OF HUMAN AND INDIVIDUAL RIGHTS PROTECTION IN UKRAINE AND THE WORLD Kostenko Oleksii, Kharytonova Olena, Kharytonov Yevhen, 2025-06-23 This monograph examines the legal issues related to the dynamics of Ukraine's digital transformation focusing on the intersection of artificial intelligence, the metaverse and the protection of human rights in general and individual rights in particular in Ukraine and the world. The monograph offers a comprehensive legal analysis of the categories and phenomena of global digitalization such as the metaverse, the artificial Internet, digital rights, digital identity etc. The key topics include understanding artificial intelligence as a legal concept, studying the problems of its legal personality and responsibility and establishing its significance and role in the context of hybrid warfare. In addition, the study analyzes the potential of artificial intelligence technologies in the economic and industrial revival of Ukraine, the possibilities and legal problems of their use in legal including notary practice in the field of medicine and pharmacy in education and the corporate sector. It also explores the current problems of using blockchain technology and artificial intelligence in the management of intellectual property rights. This emphasizes the need for interdisciplinary cooperation to address the challenges of protecting sensitive data and innovation while promoting a sustainable balance between innovation and social well-being. This work contributes to the ongoing discourse on the role of digital technologies in shaping future societies by offering a unique perspective on their application and governance on Ukraine's path to a digital society

Confluence of Artificial Intelligence and Robotic Process Automation Siddhartha Bhattacharyya, Jyoti Sekhar Banerjee, Debashis De, 2023-03-13 This book provides a detailed insight into Robotic Process Automation (RPA) technologies linked with AI that will help organizations implement Industry 4.0 procedures. RPA tools enhance their functionality by incorporating AI objectives such as use of artificial neural network algorithms, text mining techniques and natural language processing techniques for information extraction and the subsequent process of optimization and forecasting scenarios for the purpose of improving an organization's operational and business processes. The target readers of this book are researchers, professors, graduate students, scientists, policymakers, professionals and developers working in the IT and ITes sectors i.e. people who are working on emerging technologies. This book also provides insights and decision support tools necessary for executives concerned with different industrial and organizational automation-centric jobs, knowledge dissemination, information and policy development for automation in different educational, government and non-government organizations. Culturally Sustainable Social Robotics M. Nørskov,J. Seibt,O.S. Quick,2021-01-04 The subject of social robotics has enormous projected economic significance However social robots not only present us with novel opportunities but also with novel risks that go far beyond safety issues It is a potentially highly disruptive technology which could negatively affect the most valuable parts of the fabric of human social interactions in irreparable ways Since engineering educations do not yet offer the necessary competences to analyze holistically assess

and constructively mitigate these risks new alliances must be established between engineering and SSH disciplines with special emphasis on the humanities i.e. disciplines specializing in the analysis of socio cultural interactions and human experience The Robophilosophy Conference Series was established in 2014 with the purpose of creating a new forum and catalyzing the research discussion in this important area of applied humanities research with focus on robophilosophy Robophilosophy conferences have been the world's largest venues for humanities research in and on social robotics The book at hand presents the proceedings of Robophilosophy Conference 2020 Culturally Sustainable Social Robotics the fourth event in the international biennial Robophilosophy Conference Series which brought together close to 400 participants from 29 countries The speakers of the conference whose contributions are collected in this volume were invited to offer concrete proposals for how the Humanities can help to shape a future where social robotics is guided by the goals of enhancing socio cultural values rather than by utility alone The book is divided into 3 parts Abstracts of Plenaries which contains 6 plenary sessions Session Papers with 44 papers under 8 thematic categories and Workshops containing 25 items on 5 selected topics Providing concrete proposals from philosophers and other SSH researchers for new models and methods this book will be of interest to all those involved in developing artificial social agents in a culturally sustainable way that is also a fortiori ethically responsible

Handbook of Power Electronics in Autonomous and Electric Vehicles Muhammad H. Rashid, 2024-07-22 Handbook of Power Electronics in Autonomous and Electric Vehicles provides advanced knowledge on autonomous systems electric propulsion in electric vehicles radars and sensors for autonomous systems and relevant aspects of energy storage and battery charging The work is designed to provide clear technical presentation with a focus on commercial viability It supports any and all aspects of a project requiring specialist design analysis installation commissioning and maintenance services With this book in hand engineers will be able to execute design analysis and evaluation of assigned projects using sound engineering principles and commercial requirements policies and product and program requirements Presents core power systems and engineering applications relevant to autonomous and electric vehicles in characteristic depth and technical presentation Offers practical support and guidance with detailed examples and applications for laboratory vehicular test plans and automotive field experimentation Includes modern technical coverage of emergent fields including sensors and radars battery charging and monitoring and vehicle cybersecurity Artificial Intelligence and Human Rights Alberto Quintavalla, Jeroen Temperman, 2023 Human Rights and Artificial Intelligence is a seminal text on the legal ramifications of machine learning Analysing both the concept of human rights and specific rights in light of new AI technologies this expansive volume will be useful to academics professionals and policymakers navigating this complex and shifting terrain Robots in Care and Everyday Life Uwe Engel, 2022-10-13 This open access book presents detailed findings about the ethical legal and social acceptance of robots in the German and European context The key resource is the Bremen AI Delphi survey of scientists and politicians and a related population survey The focus is on trust in
