Robots Look Inside:

A Neuroscientist Looks At Robots Donald W Pfaff,2015-10-28 The book written for a general educated public compares the most important elements of the human nervous system to the corresponding capacities of robots Crucial are the areas of activities for which the constraints limiting human and robot performances are much different Those areas offer opportunities for synergies The book argues that we now understand mechanisms for emotional feelings in the human brain so well that we will be able to program robots to act as though they also have emotion Written in a clear and open fashion by an expert neuroscientist the book will appeal to interested lay readers in addition to neuroscientists and computer scientists

Robots in Industry Louise Spilsbury,Richard Spilsbury,2015-07-15 People tire easily and make mistakes when they work too long They need to sleep and eat enough in order to do their best Robots however can do repetitive tasks perfectly every time They rarely need breaks and definitely don t need naps Readers learn how integral robots have become in many parts of industry including in production factories and in situations dangerous for people Full color photographs provide readers with a unique look at a growing branch of science The main content and sidebars highlight real life examples of robots at work as well as understandable explanations of their technology

Gaze in Human-Robot Communication Frank Broz,Hagen Lehmann,Bilge Mutlu,Yukiko Nakano,2015-12-15 Gaze in Human Robot Communication is a volume collecting recent research studying gaze behaviour in human robot interaction HRI The selected articles draw inspiration from related research into gaze in human human interaction in fields ranging from ethnography to neuroscience The major themes of these articles include the experimental investigation of human responses to robot gaze the investigation of the impact of coordinating gaze acts with speech and the development of hardware and software technologies for enabling robot gaze This volume provides an excellent introduction to the depth and breadth of this growing research area in HRI The highly interdisciplinary nature of the work presented should make it of interest both to robotics researchers and to researchers from other fields with an interest in the role of gaze in communication Originally published in Interaction Studies Vol 14 3 2013

Minjy the Robot Returns Minjy the Robot A Pirate s Life and Minjy the Robot in Glitter City Minjy began her adventure in 2015 She s been on four so far which have taken her around the world Now on her fifth she desperately wants to see Wing Wong so do many others In this story Minjy Monique and Juliette are on their way from Glitter City to St Belle to see Wing They have no idea that she has gone missing somewhere in Nepal Monique and Juliette soon learn that Minjy their little robot friend has also disappeared A host of different characters are now looking for both While doing research with a group of scientists near the village of Nagarkot Wing decides to leave without telling anyone Upon discovery that she s missing helicopter pilot Mike Bellford is asked to help search for her by air Despite his persistent efforts Wing is nowhere to be found It s much the same for Minjy her whereabouts are a mystery For Monique and Juliette hope of finding their little robot friend is unwavering Yet in their wildest dreams they could not have imagined where Minjy actually is The search for Wing Wong and for Minjy continues Mike asks his son Jimmy for help and the scene shifts to beautiful Port Marcia As the story unfolds Jimmy makes friends with several people Unknowingly the mystery starts include others it is not a certainty that it can be solved A series of unlikely events unfold and lead to outcomes unforeseen Will the search for Wing Wong prove successful Will Minjy s location be discovered Will looking for Wing and Minjy uncover their whereabouts only or perhaps something more Minjy the Robot and the Search for Wing Wong is as always based on the continued theme that goodness prevails

Happy reading Construction Robots Leslie Cousineau,Nobuyasu Miura,1998-01-01 This book presents Japan s achievements in the development and application of over 100 construction robots and five automated systems The Japanese have progressed far beyond the U S in these new technologies which are already having a revolutionary impact on Japanese architecture The impact of robotics has already begun to show measured improvements in quality productivity and safety in construction *Handbook of Research on Synthesizing Human Emotion in Intelligent Systems and Robotics* Vallverdú, Jordi,2014-11-30 Emotions convey significant information through means of natural language analysis embodiment and emotional signing Machines equipped with the ability to experience and interpret emotions perform better in complex environments and share in the emotionally rich social context The Handbook of Research on Synthesizing Human Emotion in Intelligent Systems and Robotics presents a solid framework for taking human robot interaction closer to its full potential Presenting a close look at all the factors involved in modeling emotions and applying a thorough understanding of human emotional recognition to technology this volume appeals to active researchers in the fields of artificial emotions artificial intelligence computing robotics philosophy and psychology as well as to students interested in the research of synthetic emotions **Anatomy of a Robot** Despina Kakoudaki,2014-07-07 Why do we find artificial people fascinating Drawing from a rich fictional and cinematic tradition Anatomy of a Robot explores the political and textual implications of our perennial projections of humanity onto figures such as robots androids cyborgs and automata In an engaging sophisticated and accessible presentation Despina Kakoudaki argues that in their narrative and cultural deployment artificial people demarcate

what it means to be human They perform this function by offering us a non human version of ourselves as a site of investigation Artificial people teach us that being human being a person or a self is a constant process and often a matter of legal philosophical and political struggle By analyzing a wide range of literary texts and films including episodes from Twilight Zone the fiction of Philip K Dick Kazuo Ishiguro s novel Never Let Me Go Metropolis The Golem Frankenstein The Terminator Iron Man Blade Runner and I Robot and going back to alchemy and to Aristotle s Physics and De Anima she tracks four foundational narrative elements in this centuries old discourse the fantasy of the artificial birth the fantasy of the mechanical body the tendency to represent artificial people as slaves and the interpretation of artificiality as an existential trope What unifies these investigations is the return of all four elements to the question of what constitutes the human This focused approach to the topic of the artificial constructed or mechanical person allows us to reconsider the creation of artificial life By focusing on their historical provenance and textual versatility Kakoudaki elucidates artificial people s main cultural function which is the political and existential negotiation of what it means to be a person

What Robots Can and Can't Be Selmer Bringsjord,2013-03-07 ments be thrown to the wind in light of the fact that careful precise step by step deductive arguments will be presented below for each and every proposition that might be cavalierly regarded prima facie implausible Key Theses

So to put it colloquially I think we're headed toward realizing Blade Runner a classic sci-fi movie in which only an elaborate pupil scanner which detects the usual physiological correlates to an emotional response to provocative questions enables one to distinguish androids from humans. And Blade Runner turned real it seems to me will be the Age of the Philosopher. Qualia Scanner Pupils undilated. Why? Well to start this will be an era within which the so-called problem of other minds will be especially pointed because the sort of question frequently posed by instructors in introductory philosophy courses namely How do you know really know that the person next to you isn't just a robot that underneath her skull hums a complicated silicon device instead of a flesh and blood human brain. WHAT ROBOTS CAN AND CAN'T BE 4 will be a deadly serious one.

Using Robots in Hazardous Environments Y Baudoin, M K Habib, 2010-12-20 There have been major recent advances in robotic systems that can replace humans in undertaking hazardous activities in demanding or dangerous environments. Published in association with the CLAWAR Climbing and Walking Robots and Associated Technologies Association www.clawar.org this important book reviews the development of robotic systems for de-mining and other risky activities such as fire fighting. Part one provides an overview of the use of robots for humanitarian de-mining work. Part two discusses the development of sensors for mine detection whilst Part three reviews developments in both teleoperated and autonomous robots. Building on the latter Part four concentrates on robot autonomous navigation. The final part of the book reviews research on multi-agent systems MAS and the multi-robotics systems MRS promising tools that take into account modular design of mobile robots and the use of several robots in multi-task missions. With its distinguished editors and international team of contributors Using robots in hazardous environments landmine detection de-mining and other applications is a standard reference for all those researching the use of robots in hazardous environments as well as government and other agencies wishing to use robots for dangerous tasks such as landmine detection and disposal. Reviews the development of robotic systems for de-mining and other risky activities. Discusses the development and applications of sensors for mine detection using different robotic systems. Examines research on multi-agent systems and multi-robotics systems. Rising

Stars in Human-Robot Interaction Bilge Mutlu, Ginevra Castellano, James Everett Young, Séverin Lemaignan, Adriana Tapus, 2022-08-11 *Springer Handbook of Robotics* Bruno Siciliano, Oussama Khatib, 2016-07-27 The second edition of this handbook provides a state of the art overview on the various aspects in the rapidly developing field of robotics. Reaching for the human frontier robotics is vigorously engaged in the growing challenges of new emerging domains. Interacting, exploring and working with humans: the new generation of robots will increasingly touch people and their lives. The credible prospect of practical robots among humans is the result of the scientific endeavour of a half a century of robotic developments that established robotics as a modern scientific discipline. The ongoing vibrant expansion and strong growth of the field during the last decade has fueled this second edition of the Springer Handbook of Robotics. The first edition of the handbook soon became a landmark in robotics publishing and won the American Association of Publishers PROSE Award for Excellence in

Physical Sciences Mathematics as well as the organization's Award for Engineering Technology The second edition of the handbook edited by two internationally renowned scientists with the support of an outstanding team of seven part editors and more than 200 authors continues to be an authoritative reference for robotics researchers newcomers to the field and scholars from related disciplines The contents have been restructured to achieve four main objectives the enlargement of foundational topics for robotics the enlightenment of design of various types of robotic systems the extension of the treatment on robots moving in the environment and the enrichment of advanced robotics applications Further to an extensive update fifteen new chapters have been introduced on emerging topics and a new generation of authors have joined the handbook's team A novel addition to the second edition is a comprehensive collection of multimedia references to more than 700 videos which bring valuable insight into the contents The videos can be viewed directly augmented into the text with a smartphone or tablet using a unique and specially designed app Springer Handbook of Robotics Multimedia Extension Portal <http://handbookofrobotics.org>
