Robuste und adaptive Tests Herbert Büning, 2012-06-25 Keine ausführliche Beschreibung für Robuste und adaptive Tests verfügbar
Industrial Statistics Christos P. Kitsos, Lutz Edler, 2012-12-06 Devoted to the growing impact of statistical methodology and statistical computing in industry the aim of this book is to link the three components Statistics industry computers Different areas of industrial statistics are presented by a number of excellent contributions The following topics are covered Quality control engineering and monitoring reliability and failure time analysis experimental design repeated measurements multiple inference pharmaceutical statistics computing imaging and perception This book concentrates on the interface between statistical needs in industry and statistical methods developed by statisticians and engineers

Nonparametric Statistical Tests Markus Neuhauser, 2011-12-19 Nonparametric Statistical Tests A Computational Approach describes classical nonparametric tests as well as novel and little known methods such as the Baumgartner Weiss Schindler and the Cucconi tests The book presents SAS and R programs allowing readers to carry out the different statistical methods such as permutation and bootstrap tests
Theory of Nonparametric Tests Thorsten Dickhaus, 2018-03-27 This textbook provides a self contained presentation of the main concepts and methods of nonparametric statistical testing with a particular focus on the theoretical foundations of goodness of fit tests rank tests resampling tests and projection tests The substitution principle is employed as a unified approach to the nonparametric test problems discussed In addition to mathematical theory it also includes numerous examples and computer implementations The book is intended for advanced undergraduate graduate and postdoc students as well as young researchers Readers should be familiar with the basic concepts of mathematical statistics typically covered in introductory statistics courses
Development in the Asia Pacific Jong S. Jun, 1994 Comprises 26 essays which examine significant policy issues in individual countries of the Asia Pacific region from the 1950s to 1992 with emphasis on the 1980s and 1990s Includes discussions of policy making processes

Adaptive and Robust Active Vibration Control Ioan Doré Landau, Tudor-Bogdan Airimioaie, Abraham Castellanos-Silva, Aurelian Constantinescu, 2016-09-15 This book approaches the design of active vibration control systems from the perspective of today's ideas of computer control It formulates the various design problems encountered in the active management of vibration as control problems and searches for the most appropriate tools to solve them The experimental validation of the solutions proposed on relevant test benches is also addressed To promote the widespread acceptance of these techniques the presentation eliminates unnecessary theoretical developments which can be found elsewhere and focuses on algorithms and their use The solutions proposed cannot be fully understood and creatively exploited without a clear understanding of the basic concepts and methods so these are considered in depth The focus is on enhancing motivations algorithm presentation and experimental evaluation MATLAB routines Simulink diagrams and bench test data are available for download and encourage easy assimilation of the experimental and exemplary material Three major

problems are addressed in the book active damping to improve the performance of passive absorbers adaptive feedback attenuation of single and multiple tonal vibrations and feedforward and feedback attenuation of broad band vibrations Adaptive and Robust Active Vibration Control will interest practising engineers and help them to acquire new concepts and techniques with good practical validation It can be used as the basis for a course for graduate students in mechanical mechatronics industrial electronics aerospace and naval engineering Readers working in active noise control will also discover techniques with a high degree of cross over potential for use in their field

Rank and Pseudo-Rank Procedures for Independent Observations in Factorial Designs Edgar Brunner, Arne C. Bathke, Frank Konietzschke, 2019-07-15 This book explains how to analyze independent data from factorial designs without having to make restrictive assumptions such as normality of the data or equal variances The general approach also allows for ordinal and even dichotomous data The underlying effect size is the nonparametric relative effect which has a simple and intuitive probability interpretation The data analysis is presented as comprehensively as possible including appropriate descriptive statistics which follow a nonparametric paradigm as well as corresponding inferential methods using hypothesis tests and confidence intervals based on pseudo ranks Offering clear explanations an overview of the modern rank and pseudo rank based inference methodology and numerous illustrations with real data examples as well as the necessary R SAS code to run the statistical analyses this book is a valuable resource for statisticians and practitioners alike

Econometrics in Theory and Practice Robert Galata, Helmut Küchenhoff, 2012-12-06 Hans Schneeweß is one of the best known German econometricians and statisticians He was born in Glatz Silesia on March 13 1933 Hans Schneeweß studied mathematics and physics and received his Ph D degree from the Johann Wolfgang Goethe University Frankfurt in 1960 He was member of the academic staff of the Faculty of Law and Economics of the Saar University between 1959 and 1965 Following his Habilitation in 1964 he was appointed to the chair of Statistics and Econometrics at the same university As a visiting professor he worked at the Institute for Academic Studies in Vienna in 1967 and at the Department of Statistics of the University of Waterloo Canada in 1970 71 He has been a full professor of Econometrics and Statistics at the Ludwig Maximilians University in Munich since 1973 His extensive research activities abroad included important projects in Waterloo Vienna Dundee Scotland Sidney China Kiev During the more than 40 years of his academic work he has published outstanding original articles on econometrics and statistics To give an example it is his research on decision theory which has marked developments in this field His book *Entscheidungskriterien bei Risiko* published in 1967 is an excellent starting for anyone looking for an introduction to the complex issues involved

Robust Planning and Analysis of Experiments Christine H. Mueller, 2012-12-06 Author approved bcc Robust statistics and the design of experiments are two of the fastest growing fields in contemporary statistics Up to now there has been very little overlap between these fields In robust statistics robust alternatives to the nonrobust least squares estimator have been developed while in experimental design designs for the efficient use of the least square

estimator have been developed This volume is the first to link these two areas by studying the influence of the design on the efficiency and robustness of robust estimators and tests It shows that robust statistical procedures profit by an appropriate choice of the design and that efficient designs for a robust statistical analysis are more applicable The classical approaches of experimental design and robust statistics are introduced before the areas are linked Dr Christine H M ller teaches at the Department of Mathematics and Computer Science of the Free University of Berlin and is a member of the research project on Efficient Experiments in Industrial Production From 1988 1991 she worked as a biometrician at the Medical Department of the Free University of Berlin

Automotive Production Systems and Standardisation Constanze Clarke,2006-03-30 In January 2000 Mercedes Benz started to implement the Mercedes Benz Production System MPS throughout its world wide passenger car plants This event is exemplary of a trend within the automotive industry the creation and introduction of company specific standardised production systems It gradually emerged with the introduction of the Chrysler Operating System COS in the mid 1990s and represents a distinct step in the process towards implementing the universal principles of lean thinking as propagated by the MIT study For the academic field of industrial sociology and labour policy the emergence of this trend seems to mark a new stage in the evolution of the debate about production systems in the automotive industry J rgens 2002 2 particularly as it seems to undermine the stand of the critics of the one best way model Boyer and Freyssenet 1995 The introduction of company level standardised production systems marks the starting point of the present study At the core of it is a case study about the Mercedes Benz Production System MPS

Alternative Assets and Cryptocurrencies Christian Hafner,2019-07-26 Alternative assets such as fine art wine or diamonds have become popular investment vehicles in the aftermath of the global financial crisis Correlation with classical financial markets is typically low such that diversification benefits arise for portfolio allocation and risk management Cryptocurrencies share many alternative asset features but are hampered by high volatility sluggish commercial acceptance and regulatory uncertainties This collection of papers addresses alternative assets and cryptocurrencies from economic financial statistical and technical points of view It gives an overview of their current state and explores their properties and prospects using innovative approaches and methodologies

Statistical Inference, Econometric Analysis and Matrix Algebra Bernhard Schipp,Walter Krämer,2008-11-27 This Festschrift is dedicated to G tz Trenkler on the occasion of his 65th birthday As can be seen from the long list of contributions G tz has had and still has an enormous range of interests and colleagues to share these interests with He is a leading expert in linear models with a particular focus on matrix algebra in its relation to statistics He has published in almost all major statistics and matrix theory journals His research activities also include other areas like nonparametrics statistics and sports combination of forecasts and magic squares just to mention a few G tz Trenkler was born in Dresden in 1943 After his school years in East Germany and West Berlin he obtained a Diploma in Mathematics from Free University of Berlin 1970 where he also discovered his interest in Mathematical Statistics In 1973 he completed his Ph D with
