Roth, 2018-03-13 This widely acclaimed beautifully illustrated survey of Western architecture is now fully revised throughout including essays on non Western traditions The expanded book vividly examines the structure function history and meaning of architecture in ways that are both accessible and engaging **The Baroque in Architectural Culture, 1880-1980** Andrew Leach, John Macarthur, 2016-03-09 In his landmark volume *Space Time and Architecture* Sigfried Giedion paired images of two iconic spirals Tatlin's Monument to the Third International and Borromini's dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture **Historical Dictionary of Architecture** Allison Lee Palmer, 2016-05-26 This dictionary provides a historical overview of the major architectural developments and styles building materials and types major structures and locations sites and architects Historical eras like ancient Egyptian architecture and the Renaissance in Europe and movements such as Art Deco are covered Materials discussed range from concrete stone glass and wood while types of structures include architectural inventions such as the arch and dome to building types from monasteries and mosques to museums and skyscrapers Major structures highlighted in this volume include not only great achievements such as Hagia Sophia and the Eiffel Tower but also important sites such as the Great Zimbabwe and Angkor Wat found on the UNESCO World Heritage Site list General geographical areas are also covered such as African and Russian architecture

Misfits & Hybrids: Architectural Artifacts for the 21st-Century City Ferda Kolatan, 2024-06-18 Contemporary cities are shaped by the unlikely adjacencies of objects that are vastly different in kind origin and scale buildings infrastructure and other urban components that over time accumulate into mismatched configurations However despite the ubiquity of these oddities and their impact on the city we rarely give them much consideration In Misfits Hybrids Ferda Kolatan explores the untapped potential in these unexpected conditions for a new kind of architecture A diverse array of projects developed in Kolatan s design studios at the University of Pennsylvania Weitzman School of Design illustrates how hybrid artifacts can reveal the often overlooked cultural socio political and material histories of a site fostering design tactics invested in reinventing the existing Set within the cosmopolitan megacities of Istanbul Cairo and New York the projects are conceived as real fictions conjuring novel narrative aesthetic and representational forms to reflect the pluralistic postindustrial city
