enthusiasts there always exists a desire to press styling and performance a step beyond the showroom floor to truly craft an automobile of one's own. This photographic and cultural history examines the evolution of American custom cars from the 1930s to present, covering touchstone trends, influential builders, Barris, Roth, Coddington, et al. custom shows, enthusiast magazines, and regional styles. An expensive collection of rare period photography and exclusive modern shots help illustrate how Detroit informed the styling of customs and vice versa the explosion of the custom car scene after World War II and the factors that led to the custom's near death in the 1960s and its resurgence in the 80s. But most of all, this chronicle is a showcase of the great cars and people who influenced the movement through the years. *The Business of Speed* David N. Lucsko, 2008-11-03 2009 Outstanding Academic Title Choice. Since the mass production of Henry Ford's Model T car, enthusiasts have been redesigning, rebuilding, and reengineering their vehicles for increased speed and technical efficiency. They purchase aftermarket parts, reconstruct engines, and enhance body designs all in an effort to personalize and improve their vehicles. Why do these car enthusiasts modify their cars, and where do they get their aftermarket parts? Here David N. Lucsko provides the first scholarly history of America's hot rod business. Lucsko examines the evolution of performance tuning through the lens of the \$34 billion speed equipment industry that supports it. As early as 1910, dozens of small shops across the United States designed, manufactured, and sold add-on parts to consumers eager to employ new technologies as they tinkered with their cars. Operating for much of the twentieth century in the shadow of the Big Three automobile manufacturers, General Motors, Ford, and Chrysler, these businesses grew at an impressive rate, supplying young and old hot rodders with thousands of performance boosting gadgets. Lucsko offers a rich and heretofore untold account of the culture and technology of the high performance automotive aftermarket in the United States, offering a fresh perspective on the history of the automobile in America.

Lowriders in Chicano Culture Charles M. Tatum, 2011-07-22. This informed and accessible book captures the art, energy, passion, and pageantry of over 60 years of lowrider culture, an absolutely iconic Chicano and American phenomenon. Much like rap music and ethnic foods, Chicano lowrider culture has become sufficiently widespread in recent decades to almost be considered mainstream. However, those outside of lowriding may not realize that this cultural phenomenon is not the result of a recent fad; it originated in the pre-World War II era and has continued to grow and evolve since then. *Lowriders in Chicano Culture: From Low to Slow to Show* allows readers to see how this expressive culture fits within the broader context of Chicano culture and understand how lowriding reflects the social, artistic, and political dimensions of America's fastest growing ethnic group. It includes chapters that explain the culture of pachucas and cholas, the unique aesthetics of lowrider vehicles, lowrider music, shows, and clubs, the mechanics of building a lowrider vehicle, and lowrider culture in the media, including film, newspapers, and television. The book also traces how lowrider culture has recently expanded beyond the urban streets and into the massive exhibit halls of lowrider shows, exposing lowrider culture to even more enthusiasts.
