Neural Network Modeling Using SAS Enterprise Miner Randall Matignon, 2005-08 This book is designed in making statisticians researchers and programmers aware of the awesome new product now available in SAS called Enterprise Miner The book will also make readers get familiar with the neural network forecasting methodology in statistics One of the goals to this book is making the powerful new SAS module called Enterprise Miner easy for you to use with step by step instructions in creating a Enterprise Miner process flow diagram in preparation to data mining analysis and neural network forecast modeling Topics discussed in this book An overview to traditional regression modeling An overview to neural network modeling Numerical examples of various neural network designs and optimization techniques An overview to the powerful SAS product called Enterprise Miner An overview to the SAS neural network modeling procedure called PROC NEURAL Designing a SAS Enterprise Miner process flow diagram to perform neural network forecast modeling and traditional regression modeling with an explanation to the various configuration settings to the Enterprise Miner nodes used in the analysis Comparing neural network forecast modeling estimates with traditional modeling estimates based on various examples from SAS manuals and literature with an added overview to the various modeling designs and a brief explanation to the SAS modeling procedures option statements and corresponding SAS output listings

Data Mining Using SAS Enterprise Miner Randall Matignon, 2007-08-13 The most thorough and up to date introduction to data mining techniques using SAS Enterprise Miner The Sample Explore Modify Model and Assess SEMMA methodology of SAS Enterprise Miner is an extremely valuable analytical tool for making critical business and marketing decisions Until now there has been no single authoritative book that explores every node relationship and pattern that is a part of the Enterprise Miner software with regard to SEMMA design and data mining analysis Data Mining Using SAS Enterprise Miner introduces readers to a wide variety of data mining techniques and explains the purpose of and reasoning behind every node that is a part of the Enterprise Miner software Each chapter begins with a short introduction to the assortment of statistics that is generated from the various nodes in SAS Enterprise Miner v4 3 followed by detailed explanations of configuration settings that are located within each node Features of the book include The exploration of node relationships and patterns using data from an assortment of computations charts and graphs commonly used in SAS procedures A step by step approach to each node discussion along with an assortment of illustrations that acquaint the reader with the SAS Enterprise Miner working environment Descriptive detail of the powerful Score node and associated SAS code which showcases the important of managing editing executing and creating custom designed Score code for the benefit of fair and comprehensive business decision making Complete coverage of the wide variety of statistical techniques that can be performed using the SEMMA nodes An accompanying Web site that provides downloadable Score code training code and data sets for further implementation manipulation and interpretation as well as SAS IML software

programming code This book is a well crafted study guide on the various methods employed to randomly sample partition graph transform filter impute replace cluster and process data as well as interactively group and iteratively process data while performing a wide variety of modeling techniques within the process flow of the SAS Enterprise Miner software Data Mining Using SAS Enterprise Miner is suitable as a supplemental text for advanced undergraduate and graduate students of statistics and computer science and is also an invaluable all encompassing guide to data mining for novice statisticians and experts alike

SAS for Forecasting Time Series John C. Brocklebank, David A. Dickey, 2003-07-14 Easy to read and comprehensive this book shows how the SAS System performs multivariate time series analysis and features the advanced SAS procedures STATSPACE ARIMA and SPECTRA The interrelationship of SAS ETS procedures is demonstrated with an accompanying discussion of how the choice of a procedure depends on the data to be analysed and the results desired Other topics covered include detecting sinusoidal components in time series models and performing bivariate correlation spectral analysis and comparing the results with the standard transfer function methodology The authors unique approach to integrating students in a variety of disciplines and industries Emphasis is on correct interpretation of output to draw meaningful conclusions The volume co published by SAS and JWS features both theory and practicality and accompanies a soon to be extensive library of SAS hands on manuals in a multitude of statistical areas The book can be used with a number of hardware specific computing machines including CMS Mac MVS Opem VMS Alpha Opmen VMS VAX OS 390 OS 2 UNIX and Windows

Epidemiology and the Delivery of Health Care Services Denise M. Oleske, 2007-05-08 In the previous edition of this book the predominant theme was applying epidemiology to assist managers in dealing with an environment in which the structure of health care financing was rapidly changing to managed care and in which there was increasing competition among health care providers While these phenomena continue to exist new challenges have emerged and in particular the explosion of information technology has given way to a global society and decision making that is increasingly shared with consumers because of their access to the same sets of data Thus the questions with which health care managers are confronted on a daily basis are now exceedingly more complex 1 How can a population be defined considering that both exposures and diseases originating in one corner of the globe can rapidly become a threat to any nation s security 2 Where do influences on a population begin and end 3 How can we protect and promote health in that population or any population if privacy is preeminent This edition brings in this editor s view of the increasing need for health care managers be they in private or public settings to use epidemiological concepts and methods The challenges posed by health care delivery in the 21st century are immense ranging from redefining life and health given the advances in genetic technology global environmental changes and multinational simultaneous increases in poverty and longevity to economic decisions regarding technology and service levels that fewer and fewer can afford
