Unsustainable World Peter N. Nemetz,2022-02-27 Using a cross disciplinary science and economics based approach this book provides a sobering and comprehensive assessment of the multifaceted barriers to achieving sustainability at a global level Organized into three parts the book defines sustainability in part I and sets the context of the historical and current difficulties facing the world today In parts II and III it outlines the sustainability challenges faced in transportation manufacturing and agriculture and then in turn addresses the solutions conditional solutions and nonsolutions to these challenges These include electric and autonomous automobiles nuclear power renewable energy geoengineering and carbon capture and storage The author attempts to differentiate among those proposed solutions and discusses which are most promising and which are infeasible counterproductive and potentially a waste of time and money In each of the book s chapters the scientific evidence is presented in detail in keeping with the advice of the young Swedish climate activist Greta Thunberg to let the science speak for itself The author outlines why sustainability is unlikely to be achieved in several key areas of human endeavor and readers are challenged to weigh the scientific evidence for themselves Using an economic business based approach this book introduces students and general readers to the challenges of sustainability and the environmental difficulties facing humanity

today The Delusion of Atheism Patrick Mooney,2020-09-29 Both atheistic materialism and organized religion have been the two great forces which have had the greatest mind control over Western Civilization s perception and value system Both systems have used their power to keep humanity in subjugation and slavery through the tactics of fear and terror Both systems have denied humanity the dignity of its true Divine identity When social systems exist for the sole purpose of strengthening and propelling their own self interest rather the welfare of its citizens then the matrix in which humanity lives becomes corrupt and decadent When a people are denied the understanding of their own self concept as a unique person and a child of God they become disassociated from their own holographic identity Nature does not tolerate a vacuum Dystopia rushes in to replace the void caused by the split or the dualism which both atheism and organized religion cause in world which some non local Supreme Intelligence created for a more noble purpose Atheistic Materialism denies the existence of A Creator and is pessimistically Nihilistic Organized Religion while admitting an Omega or an absolute divides the soul from the body and turns this world Into a vale of tears The New Science of Quantum Physics teaches that the Whole is greater than the sum of its parts and the substrata of the atom is consciousness Quantum teaches the Cosmos is one There is no separation All that exists is linked together in the one reality of interdependence interconnection and interrelationship Consciousness is eternal It carries on after the atoms of our bodies have deteriorated and gone Consciousness tells us that despite the momentary reality of our bodies we are spiritually eternal Materialistic Atheism is temporary and built of the false promise of economy and profit It proposes tragedy instead of ecstasy Consciousness joins body and soul together Life in this world in other world is a continuum Life here is sacred and must be lived in this respect Whether we like it or not we are doomed to be spiritual It is the human spirit which is primary Consciousness teaches us this Terribly Atheism has inverted this It makes the body and its temporality primary It forgets and denies humanity s need for transcendence Atheism stultifies It concerns itself with grasping rather than reaching Atheism is greedy It is anti compassion This world will surely fail unless we begin to become aware that love is our highest electromagnetic capability and selfishness our lowest *Earth Democracy* Vandana Shiva,2005-11 Aims to bring to international attention the genetic food engineering cultural theft and natural resource privatisation This book uncovers their links to the rising tide of fundamentalisms violence against women and the environmental death of the planet It illustrates how the commons continue to shrink as natural resources are patented **The Future of U.S. Farm Policy:, ... Serial No. 112-30, Part 1, March 9, 2012, March 23, 2012, March 30, 2012, April 20, 2012, 112-2 Hearings, *. ,2013 The Future of U.S. Farm Policy** United States. Congress. House. Committee on Agriculture,2012 **The Meaning of Growth** Richard McNeill Douglas,2025-09-30 Since the Limits to Growth report was published in 1972 it has been widely known that a commitment to endless growth was putting us on course for environmental disaster so why have we failed to take decisive political action in the half century since then In The Meaning of Growth Richard McNeill Douglas uses interpretive social science to uncover the cultural roots of political

resistance to environmental science and policy Through a close reading of anti environmentalist rhetoric the book identifies its idolisation of growth as a defence of a modern Western European world view focusing on values of freedom power and immortality The significance of these findings is drawn out by applying the secularisation thesis a theoretical account of the development of a modern understanding of reality from a theological world view to which it is ostensibly opposed This framework is used to offer a deep interpretation of what is at stake in environmental debate that to accept there are limits to growth means abandoning crucial elements of a faith in a theodicy of progress that makes life meaningful in a secular age Douglas concludes by suggesting that the precondition for political action on the environment is a change of philosophical perspective that provides for a sense of meaning in a world of limits This book should be of interest to academics in the fields of environmental sociology and communications studies as well as activists interested in understanding the motivations of anti environmentalist campaigners and how to counter their influence

Eco Survival Priya Lokare, Dr. Keshamma E., Sumit Kumar, 2022-04-08 Environmental issues are the harmful effects of human activities on the environment These include pollution over population waste disposal climate change global warming and the greenhouse effect Various environment protection programs are being practiced at the individual organizational and government levels to establish a balance between man and the environment *Eco Survival* is a book that talks about the solutions to environmental issues Nowadays no field is aloof from ecological problems Usually there is a lot of talk about the causes and effects but lesser think about the solutions We have made a small effort to put the ecological issues and solutions from this book People are aware of some environmental problems but they don't know how to mitigate this However some problems that are unknown to common people like deleting just a spam email from the mailbox can reduce carbon emissions and save our planet Newly arrived global warming issues like cryptocurrency mining increases greenhouse gas emissions which can increase global warming beyond 20C The book discusses waste management bioherbicides ethnomedicine eco tourism eco bricks ecocity and the role of nanotechnology to mitigate pollution and reduce environmental pollution with the help of Genetically Modified organisms many more The book is a small initiative to create awareness about environmental concerns and how Eco friendly sustainable options could be available if we can put effort into saving mother earth

Making Profits, Protecting Our Planet, 2005 This book i identifies a range of market and social forces driving the private sector toward more responsible environmental stewardship ii shows the need for governments the private sector and communities to adjust their relations iii and argues for enhanced enforcement of environmental regulations by governments even as they reach out to the private sector for stronger collaboration in environmental protection

Historical Dictionary of the Green Movement Miranda Schreurs, Elim Papadakis, 2020-02-26 There are very serious environmental problems facing the planet Biodiversity loss has reached unprecedented levels Climate change is progressing so rapidly that within this century we are likely to see substantial sea level rise There has been dramatic loss of tropical rainforests Plastic pollution is killing wildlife and polluting our oceans

Various movements old and new are addressing these green issues Civil society activism has taken on new strategies with the emergence of new technologies and global networks of green activists have formed A new generation of green activists are emerging and boldly criticizing the status quo At the same time in some parts of the world green movements that looked like they were beginning to gain a political foothold or were even doing quite well are in retreat The reasons are complex Some suffer from lack of funding and hostile political and legal environments Others are being attacked by populist politicians who see green activism as a threat The second edition of Historical Dictionary of the Green Movement contains a chronology an introduction and an extensive bibliography The dictionary section has over 300 cross referenced on green movements green politics green trends and major environmental agreements and events This book is an excellent resource for students researchers and anyone wanting to know more about the green movement
