saving seeds from your garden is a perfect way of saving money and preserving heirloom varieties Saving seed is the backbone of gardening Saving seeds is a way to generate free food You could grow a free lunch by keeping and growing your seeds I remember reading a book as a child that told a story of a seed that wanted to live forever that wanted to be perpetual After restless search and failed attempts it finally realized that to live on it had to die as a seed and be buried on the ground for a new plant and seed to grow It will help if you keep planting to save seeds Seeds aren t the most expensive purchase in

the world but they can add up fast if you've got a large garden. Saving at least a few of your favorite varieties can save you some cash each year. We are pacified into a false sense of confidence when we can pick up the phone and place an order or order online and within a week the seeds show up in our mailbox. Nevertheless things can happen. As a business grower I was looking to increase my fall offerings to the eateries I sold to and decided purchasing seeds would be good although I had never grown them before. I checked the calendar and I had just enough time to get a crop for fall sales if I planted it in the next week. For some reason the seed companies I dealt with on the East coast were out of seeds which was surprising. So I ordered the seeds from another region. Remember I live in an area where territorial seeds had always been prompt so things would work out or so I thought. That was the year that the UPS workers went on strike. My seeds were sent out and then sat in a UPS warehouse between here and there. They arrived three weeks later too late for my plans that's when I decided I must start saving my seeds. The practice of reusing and exchanging seeds provides foundation for food production and allows humans and seed to adapt together in dynamic socio-natural conditions. But the practice and its practitioners are easily taken for granted even as they are threatened by neoliberalisation. Combining original ethnographic research with investigation of an evolving corporate seed order this book reveals seed saving not only as it occurs in fields and gardens but also as it associates with genebanking genetic engineering intellectual property rights and agrifood regulations. Drawing on diverse social sciences literatures Phillips illustrates ongoing practices of thinking feeling and acting with seeds raising questions about what seed people relations should accomplish and how different ways of relating might be pursued to change collective futures.
