Animal Traffic Rosemary-Claire Collard, 2020-08-24 Parrots and snakes wild cats and monkeys exotic pets can now be found everywhere from skyscraper apartments and fenced suburban backyards to roadside petting zoos In *Animal Traffic* Rosemary Claire Collard investigates the multibillion dollar global exotic pet trade and the largely hidden processes through which exotic pets are produced and traded as lively capital Tracking the capture of animals in biosphere reserves in Mexico Guatemala and Belize their exchange at exotic animal auctions in the United States and the attempted rehabilitation of former exotic pets at a wildlife center in Guatemala Collard shows how exotic pets are fetishized both as commodities and as objects Their capture and sale sever their ties to complex socio ecological networks in ways that make them appear as if they do not have lives of their own Collard demonstrates that the enclosure of animals in

the exotic pet trade is part of a bioeconomic trend in which life is increasingly commodified and objectified under capitalism Ultimately she calls for a wild life politics in which animals are no longer enclosed retain their autonomy and can live for the sake of themselves *Worth Saving* Anne Egelston,2022-08-31 This textbook is intended to be used in an upper level international environmental issues class as part of the American Environmental Studies and Sciences book series This class is commonly taught at both the undergraduate and graduate level as part of either an environmental studies program a political science program or within a policy track of an environmental science program Given the length of time that negotiations have occurred a new generation of students and practitioners will need to understand the complex processes that produced many of our environmental treaties The majority of the students in environmental studies do not have a background in political science Moving from a political science approach to an interdisciplinary approach will benefit the students by making the material more accessible As these fields continue to grow and develop regulatory compliance becomes increasingly important Thus this book is aimed at adding a business and industry perspective to this field where appropriate

Freeman,2020-12-01 With *The Human Animal Earthling Identity* Carrie P Freeman asks us to reconsider the devastating division we have created between the human and animal conditions leading to mass exploitation injustice and extinction As a remedy Freeman believes social movements should collectively foster a cultural shift in human identity away from an egoistic anthropocentrism human centered outlook and toward a universal altruism species centered

ethic so people may begin to see themselves more broadly as human animal earthlings To formulate the basis for this identity shift Freeman examines overlapping values supporting life fairness responsibility and unity that are common in global rights declarations and in the current campaign messages of sixteen global social movement organizations that work on human civil rights nonhuman animal protection and or environmental issues such as Amnesty International Human Rights Watch CARE People for the Ethical Treatment of Animals the World Wildlife Fund the Sea Shepherd Conservation Society the Nature Conservancy the Rainforest Action Network and Greenpeace She also interviews the leaders of these advocacy groups to gain their insights on how human and nonhuman protection causes can become allies by engaging common opponents and activating shared values and goals on issues such as the climate crisis enslavement extinction pollution inequality destructive farming and fishing and threats to democracy Freeman s analysis of activist discourse considers ethical ideologies on behalf of social justice animal rights and environmentalism using animal rights respect for sentient individuals as a bridge connecting human rights to a more holistic valuing of species and ecological systems Ultimately Freeman uses her findings to recommend a set of universal values around which all social movements campaign messages can collectively cultivate respectful relations between human animal earthlings fellow sentient beings and the natural world we share **Lifesize:**
