Saving The Constitution From The Courts:

Saving the Constitution from the Courts William Gangi,1995 In Roosevelt's New Deal days the threat from the Court was the judges attempt to run the nation's economy Now as the limits of individual freedoms are increasingly unrestrained Gangi sees a parallel but perhaps more fundamental peril He challenges the reader to pick up any newspaper and find in it judges telling lawmakers what to do and how to do it Gangi does not doubt the good will of the reformers in the short term recent expansions of rights are beneficial But he argues abuse of judicial power is eroding a more basic American freedom the people's right to self government Gangi is concerned that present justices no longer understand American structures as set up by the framers of the Constitution and he gives an exhaustive summary of The Federalist Papers a classic defense of the original document written by Hamilton Jay and Madison under the pen name Publius Conservatives and liberals alike are guilty he says Recent Supreme Courts are an embarrassment to the American political tradition Troubled by the shadow of a new tyranny the author does not pull his punches Where he sees bias masquerading in legal garb he names it and he urges activists to stop the unseemly scurrying to the courts every time a public policy battle is lost Gangi concludes that if Americans are to regain control of their government they must first rediscover their faith in democracy Not everyone will agree with the views espoused in this provocative book but all who read it will understand a great deal better the critical issues with which it deals BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

How to Save a Constitutional Democracy Tom Ginsburg, Aziz Z. Huq, 2018-10-05 We can t afford to be complacent any more A formidable book extremely rich in historical examples case studies and quantitative data International Journal of Constitutional Law Democracies are in danger Around the world a wave of populist leaders threatens to erode the core structures of democratic self rule In the United States the tenure of Donald Trump marks a decisive turning point for many What kind of president intimidates jurors calls the news media the enemy of the American people and seeks foreign assistance investigating domestic political rivals Many think the Constitution will safeguard us from lasting damage But is that assumption justified Drawing on an array of other countries experiences Tom Ginsburg and Aziz Z Huq show how constitutional rules can both hinder and hasten the decline of democratic institutions The checks and balances of the federal government a robust civil society and media and individual rights such as those enshrined in the First Amendment often fail as bulwarks against democratic decline The sobering reality they contend is that the US Constitution's design makes democratic erosion more not less likely Its structural rigidity has had unforeseen consequence leaving the presidency weakly regulated and empowering the Supreme Court to conjure up doctrines that ultimately facilitate rather than inhibit rights violations Even the bright spots in the Constitution the First Amendment for example may have perverse consequences in the hands of a deft communicator who can degrade the public sphere by wielding hateful language banned in many other democracies We and the rest of the world can do better and the authors conclude by laying out practical steps for how laws

and constitutional design can play a more positive role in managing the risk This book makes a huge contribution to our understanding of how democracies erode and what institutional reforms would make it harder for authoritarian populists to entrench their power Yascha Mounk author of The People vs Democracy Whereas other recent books on the crisis of American democracy focus on what has gone wrong Ginsburg and Huq provide us with clear eyed proposals including some bold constitutional reforms for how to fix it Steven Levitsky New York Times bestselling coauthor of How Democracies Die

argumentation Constitutionality of Law without a Constitutional Court Mirosław Granat, 2023-09-01 This book analyses the problem of the possibility of guaranteeing the constitutionality of law in cases when a constitutional court either has been weakened or does not exist A starting point of the research is the emergence of the so called illiberal constitutionalism in several states namely Poland Hungary and Turkey as this phenomenon gravely affects the functioning of constitutional courts The work is divided into three parts The first contains contributions of a theoretical nature dedicated to the current shape of constitutional review in particular in the light of the emergence of illiberal constitutionalism. This part of the book also deals with the collapse of the centralised constitutional review in Poland and the attempts to resolve the constitutional crisis The second is focused on discussing specific current problems with constitutional review on the basis of states such as Hungary Romania Turkey and Poland The third relates to other forms of constitutional review that is the so called dispersed model and the parliamentary one executed in the course of the legislative process The contributions discuss such forms of constitutional review in the Netherlands and Finland The book will be a valuable resource for students academics and policy makers working in the areas of constitutional law and politics European Yearbook of Constitutional Law 2022 Jurgen de Poorter, Gerhard van der Schyff, Maarten Stremler, Maartje De Visser, Ingrid Leijten, Charlotte van Oirsouw, 2023-07-25 The European Yearbook of Constitutional Law EYCL is an annual publication devoted to the study of constitutional law It aims to provide a forum for in depth analysis and discussion of new developments in the field both in Europe and beyond This fourth volume of the EYCL addresses the underexplored and contentious topic of whether the EU possesses a constitutional identity of its own To date the main focus of scholarship and case law concerns the constitutional identities of the Member States of the EU This is because the EU has to respect such identities according to article 4 2 TEU The attention for Member States constitutional identities stands in stark contrast to the notion of an EU constitutional identity Such an identity features very little in the literature and debate on constitutional identity and the legal architecture of the EU Consequently this edition of the EYCL addresses the gap in legal research by studying constitutional identity with a focus on the EU itself The book explores various views on whether the EU possesses such an identity and what any possible identity might entail In this way a fuller and more inclusive picture can be formed of constitutional identity as it relates to the multilevel constitutional order inhabited by the EU and its Member States This volume will be of special interest to constitutional and legal scholars who are interested in EU and national constitutional law as well as to political scientists In addition the book is relevant for judges government officials judges and policy makers who work with EU constitutional law and its relationship with national constitutional law Jurgen de Poorter is State Councillor at the Dutch Council of State and professor at Tilburg Law School Department of Public Law and Governance Gerhard van der Schyff is associate professor at Tilburg Law School Department of Public Law and Governance Maarten Stremler is assistant professor at Maastricht University Faculty of Law Department of Public Law Maartje De Visser is associate professor at SMU School of Law Singapore Ingrid Leijten is professor at Tilburg

justice regimes across borders This book is essential reading for anyone interested in the study and development of human rights and capital punishment as well as those exploring the contours of comparative criminal justice Legal dispute over the Constitutional Court in Poland Bogumił Szmulik, Jarosław Szymanek, 2020 The strengthening of the position of courts was to a large extent the result of the creation and rapid development of constitutional justice. It has made the power that was in some measure next to nothing a real power and the apolitical placement of courts changed into a political one or at least one leading to serious political repercussions. There is no doubt today that courts are a branch of power in the full sense of the word and some even point out that because of constitutional justice they have become de facto the first power From the position of a passive power they have changed their placement mainly owing to constitutional justice to that of an active power which competes on a par with the authority of the parliament and government in search of a golden mean of political balance As a consequence constitutional courts have slowly but very consistently forged their position by stepping into the shoes of a power that is as a matter of fact a political and active one This apart from prestige and recognition for constitutional courts has also created the threat that like with all the other active branches of power they would become a participant in disputes and polemics and could enter into a classic power conflict Political disputes over the Constitutional Court cannot be eliminated altogether The Court by its very nature may betray political engagement or at least its judicial decisions will have a political effect which means that it will be engaged in the political optics of rivalry between the separated branches of power The constitutional drafters acting rationally should therefore exercise due care to eliminate possible tensions Political disputes cannot be predicted nor can they be eliminated However they can be mitigated and unfortunately this is still missing in the Polish Constitutional Court model FROM THE INTRODUCTION Nott and McCord's Reports of Cases Determined in the Constitutional Court of South Carolina Henry Junius Nott, South Carolina. Constitutional Court of Appeals, David James McCord, 1860 Reports of Cases Determined in the District Courts of Appeal of the State of California ,1927 The Max Planck Handbooks in European Public Law Armin von Bogdandy, Peter Huber, Christoph Grabenwarter, 2020-03-12 The Max Planck Handbooks in European Public Law describe and analyse public law of the European legal space an area that encompasses not only the law of the European Union but also the European Convention on Human Rights and importantly the domestic public laws of European states Recognizing that the ongoing vertical and horizontal processes of European integration make legal comparison the task of our time for both scholars and practitioners the series aims to foster the development of a specifically European legal pluralism and to contribute to the legitimacy and efficiency of European public law The first volume of the series began this enterprise with an appraisal of the evolution of the state and its administration offering both cross cutting contributions and specific country reports The third volume the second in chronological terms continues this approach with an in depth appraisal of constitutional adjudication in various and diverse European countries Fourteen country reports and two cross cutting contributions investigate the

antecedents foundations organization procedure and outlook of constitutional adjudicators throughout the Continent They include countries with powerful constitutional courts jurisdictions with traditional supreme courts and states with small institutions and limited ex ante review In keeping with the focus on a diverse but unified legal space each report also details how its institution fits into the broader association of constitutional courts that through dialogue and conflict brings to fruition the European legal space Together the chapters of this volume provide a strong and diverse foundation for this dialogue to flourish **Journal of Proceedings ...
