Irving and James Fenimore Cooper created a distinctly American literature grounded in folklore and history that contributed to the emergence of a sense of place in the valley. Painters led by Thomas Cole founded the Hudson River School, widely recognized as the first truly national style of art. As the century advanced and as landscape and history became increasingly intertwined in the national consciousness, an aesthetic identity took shape in the region through literature, art, memory, and folklore, even gardens and domestic architecture. In *Sanctified Landscape*, David Schuyler recounts this story of America's idealization of the Hudson Valley during the nineteenth and early twentieth centuries. Schuyler's story unfolds during a time of great change in American history. At the very moment when artists and writers were exploring the aesthetic potential of the Hudson Valley, the transportation revolution and the rise of industrial capitalism were transforming the region. The first generation of American tourists traveled from New York City to Cozzens Hotel and the Catskill Mountain House in search of the picturesque. Those who could afford to live some distance from jobs in the city built suburban homes or country estates. Given these momentous changes, it is not surprising that historic preservation emerged in the Hudson Valley; the first building in the United States preserved for its historic significance is Washington's Headquarters in Newburgh. Schuyler also finds the seeds of the modern environmental movement in the transformation of the Hudson Valley landscape. Rich, illustrated, and compellingly written, *Sanctified Landscape* makes for rewarding reading. Schuyler expertly ties local history to national developments, revealing why the Hudson River Valley was so important to nineteenth-century Americans and why it is still beloved today.

Writing the Land Daniel G. Payne, 2009-05-05. At the time of his death in 1921, John Burroughs (1837-1921) was America's most beloved nature writer, a best-selling author whose friends and admirers included Walt Whitman, Theodore Roosevelt, John Muir, Henry Ford, and Thomas Edison. Burroughs was second only to Emerson in fostering the nature study movement of the nineteenth century, and the popularity of his work inspired Houghton Mifflin to publish or reissue the work of numerous other nature writers, including that of Thoreau and Muir. His first collection of essays, *Wake Robin*, was published in 1871, and over the next fifty years Burroughs wrote almost two dozen books and hundreds of essays, not only on nature but on literature, travel, philosophy, religion, and science. By the turn of the century, Burroughs was America's most beloved nature writer, whose friends and admirers included Walt Whitman, Theodore Roosevelt, John Muir, Henry Ford, and Thomas Edison. Burroughs died in 1921 while on a train ride back to his New York from California. His final words, "Are we home yet," were a remarkably fitting coda to the career of a writer so closely identified with his native Catskill region of New York State. In many of his essays, Burroughs explores the woods and fields of home, and in doing so, like Henry Thoreau and his explorations of Concord, Massachusetts, he transcends the local and examines the universal theme of our relation with nature and our native landscape. Burroughs's emphasis on place and the local now seems modern, once again, as the current interest in bioregionalism and climate change demonstrates it. It has become increasingly evident that thinking locally is thinking globally. Since 1992, the SUNY College at Oneonta has hosted the biannual John Burroughs Nature Conference, and

Seminar Sharp Eyes which honors the influence of Burroughs on American nature writing Distinguished keynote speakers who have addressed the conference include John Elder John Tallmadge Joy Harjo Robin Wall Kimmerer Edward Kanze James Perrin Warren and Edward J Renshan Jr The scope of the conference is not limited solely to Burroughs however as each year the writers and scholars in attendance direct their attention toward a particular issue of significance to contemporary nature writers and scholars of environmental literature The theme of this collection Writing the Land John Burroughs and his Legacy was featured in the 2006 conference and includes essays on John Burroughs as well as essays on the work of other writers who like Burroughs are linked closely through their work to a particular landscape or region The third and final section of this book features invited essays by three distinguished scholars John Tallmadge Robert Beuka and Charlotte Zo Walker who consider the topic of what writing about the land and nature means from three different perspectives urban suburban and rural

John Burroughs and the Place of Nature James Perrin Warren, 2010-02-25 This study situates John Burroughs together with John Muir and Theodore Roosevelt as one of a trinity of thinkers who between the Civil War and World War I defined and secured a place for nature in mainstream American culture Though not as well known today Burroughs was the most popular American nature writer of his time Prolific and consistent he published scores of essays in influential large circulation magazines and was often compared to Thoreau Unlike Thoreau however whose reputation grew posthumously Burroughs was a celebrity during his lifetime he wrote more than thirty books enjoyed a continual high level of visibility and saw his work taught widely in public schools James Perrin Warren shows how Burroughs helped guide urban and suburban middle class readers back to nature during a time of intense industrialization and urbanization Warren discusses Burroughs's connections not only to Muir and Roosevelt but also to his forebears Emerson Thoreau and Whitman By tracing the complex philosophical creative and temperamental lineage of these six giants Warren shows how in their friendships and rivalries Burroughs Muir and Roosevelt made the high literary romanticism of Emerson Thoreau and Whitman relevant to late nineteenth and early twentieth century Americans At the same time Warren offers insights into the rise of the nature essay as a genre the role of popular magazines as shapers and conveyors of public values and the dynamism of place in terms of such opposed concepts as retreat and engagement nature and culture and wilderness and civilization Because Warren draws on Burroughs's personal critical and philosophical writings as well as his better known narrative essays readers will come away with a more informed sense of Burroughs as a literary naturalist and a major early practitioner of ecocriticism

John Burroughs and the Place of Nature helps extend the map of America's cultural landscape during the period 1870-1920 by recovering an unfairly neglected practitioner of one of his era's most effective forces for change nature writing Signs and Seasons John Burroughs, 2006-05-29 Renowned as a pioneer of the new school of nature writing and among the most widely read authors of his time John Burroughs has had a profound influence on our appreciation of nature Signs and Seasons originally published in 1886 provides an excellent introduction to the extensive work of one of America's great writers

Because the essays were collected and arranged by Burroughs himself they offer a synoptic view of his complex and many sided genius *Signs and Seasons* covers a wide range of Burroughs s interests including plants and animals the wilderness pastoral landscapes and the methods and goals of the naturalist An authoritative new introduction by Jeff Walker makes Burroughs s work relevant to the twenty first century not only through Burroughs s excellent natural history writing but also through his beliefs about community sustainability and social justice Additional notes give historical and scientific context for each essay and offer the reader fresh insight into his work Walker s intimate knowledge of the Hudson River valley Riverby and Slabsides the areas about which Burroughs writes reveals sympathy for and understanding of Burroughs s work This edition will be indispensable to the devotee of John Burroughs s writing and to a new generation of environmental reader

Forest and Garden Melanie Louise Simo,2003 How wild and managed or artificially arranged environments coexist has long been a matter of intense debate among foresters and landscape professionals **Rachel Carson** Karen F. Stein,2013-02-11 Karen F Stein University of Rhode Island Kingston USA Rachel Carson is the twentieth century s most significant environmentalist Her books about the sea blend science and poetry as they invite readers to share her celebration of the ocean s wonders *Silent Spring* her graphic and compelling expos of the damage caused by the widespread aerial spraying of persistent organic pesticides such as DDT opened our eyes to the interconnectedness of all living beings and the ecological systems we inhabit Carson s work challenges our belief that science and technology can control the natural world asks us to recognize our place in the world around us and inspires us to treat the earth respectfully She calls us to rekindle our sense of wonder at nature s power and beauty and to tread lightly on the earth so that it will continue to sustain us and our descendants This book guides readers on a journey through Carson s life and work considers Carson s legacies and points to some of the continuing challenges to sustainability It provides a listing of resources for reading learning or teaching about the environment about nature writing and about Carson and the crucial issues she addressed *Birds and Bees, Sharp Eyes, and Other Papers* John Burroughs,2019-11-22 In *Birds and Bees Sharp Eyes and Other Papers* John Burroughs showcases his profound reverence for nature and its intricate details Through a series of essays Burroughs eloquently intertwines observations of wildlife with reflections on the human experience employing a lyrical and accessible prose style that invites readers into the delicate world of flora and fauna Written during the late 19th century the book is an essential contribution to the transcendentalist literary context echoing the philosophies of Emerson and Thoreau while also establishing its unique voice in natural history and environmental ethics John Burroughs a key figure in the American nature writing movement was deeply influenced by his pastoral upbringing in New York His lifelong fascination with the natural world not only shaped his writing but also propelled his advocacy for conservation during a time of rapid industrialization As a contemporary of the early environmentalist movement his work serves as both a celebration of nature and a poignant call for its preservation rooted in his extensive scientific observation and philosophical musings This collection is essential for

anyone with an interest in nature writing or the early environmental consciousness in America Burroughs blend of poetic observation and keen insight makes the text not only informative but also deeply moving making it a must read for eco enthusiasts naturalists and literary scholars alike
