Monsters in Society: An Interdisciplinary Perspective Andrea S. Dauber, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2014 Are monsters and the monstrous phenomena that transition time and space If monsters were a part of our past and are a part of our present will they be a part of our future This volume demonstrates the universality of monsters and the ubiquitous nature of monsterisation from different perspectives and shows that the creation of monsters and our ongoing confrontation with them is bound by human sociality so much so that the monsters we have been surrounded by and will encounter in the future bear characteristics that mirror inherently human modes of identity construction for example via age gender and visual appearance This process can differ across life stages such as childhood versus adulthood Monsters or what a society identifies as monstrous are not simply cultural artefacts communicated via literature historical accounts or modern media productions such as films or series They are integral components of the human psyche Therefore they have existed in symbiosis with the homo socius and will probably continue to do so in his future
