- ★ **Political-ethical conflict** = conflict between one's ethical belief system and what one feels compelled to do or is told to do by someone in a position of power. Many conflicts exist in the nursing profession, which are of concern because quality patient care and public health are at stake, e.g.
- ★ the difference between historical ideas of what nursing was and the new image of what nursing has become,
- ★ the contrast between the perceived weakness of the female gender and the strength of the nursing profession as a whole (eg, the largest single sector of the health care industry), and
- ★ the inconsistency between the goals of the physician and institutional sectors of the health care industry with goals of the nursing profession.

**Nurse Educators and Politics** Sondra Z. Koff, 2012-02-01 Although they represent a significant majority of American health care providers, nurses have had only a limited influence on policy developments in the health care and political systems. Helping to understand why the profession has remained a sleeping giant, *Nurse Educators and Politics* focuses on a primary socialization agent to the profession: nursing faculty members. Using survey data, Sondra Z. Koff examines nurse educators' attitudes toward select public policies and political participation as well as their political and organizational activism. These findings are related to nursing's professional history and are discussed in a broader political context to better understand nurses' behavior in the decision-making process.

*Daring to Care* Susan Gelfand Malka, 2022-08-15 Beginning in the 1960s second wave feminism inspired and influenced dramatic changes in the nursing profession Susan Gelfand Malka argues that feminism helped end nursing s subordination to medicine and provided nurses with greater autonomy and professional status She discusses two distinct eras in nursing history The first extended from the mid 1960s to the mid 1980s when feminism seemed to belittle the occupation in its analysis of gender subordination but also fueled nursing leaders drive for greater authority

and independence The second era began in the mid 1980s when feminism grounded in the ethics of care appealed to a much broader group of caregivers and was incorporated into nursing education While nurses accepted aspects of feminism they did not necessarily identify as feminists Nonetheless they used passed on and developed feminist ideas that brought about nursing school curricula changes and the increase in self directed and specialized roles available to caregivers in the twenty first century
