Nurses Society WOCN It is the ideal reference for anyone seeking certification as a wound ostomy or continence nurse as well as anyone who manages patients with urinary or fecal incontinence as well as bowel dysfunction *Nursing for Continence* Katherine F. Jeter, Nancy Faller, Christine Norton, 1990 This book covers assessment and interventions for urinary and fecal incontinence resulting from virtually all causes Provides necessary information on differences resulting from age gender and medical conditions Also discusses effectiveness and uses of incontinence products and provides detailed advice on many other practical aspects of care Necessary theoretical background and research when appropriate are also included Distribution limited to US and Canada The Promotion of Continence in Adult Nursing David Colborn, 2013-11-11 The prime motivation for this book has come from my experience with those who suffer from incontinence and from my contact both in the clinical area and as a teacher with those who care for them Over the years I have developed a passionate interest in the subject and there is little doubt that in general terms the level of knowledge and awareness relating to the topic has increased Despite this it is still apparent that continence promotion remains a somewhat fringe subject both in practice and in theory One of the difficulties which has become clear from discussion with nurses of all grades is that they feel that the only people who are capable of mastering the practicalities of continence promotion are full time continence advisers It is unlikely that this view has stemmed from continence advisers themselves those that I know are usually very grateful for all the help that they can get or even from a reluctance on the part of nursing staff to develop their skills The root of the difficulty appears to be a lack of awareness on the part of nurses of the skills that are required for continence promotion and also how they can be put into practice The aim of this book is to provide a reference text to enable all practising nurses to take an active part in continence promotion and the appropriate management of incontinence *Urinary and Fecal Incontinence* Dorothy Beckley Doughty, 1991 Wound, Ostomy and Continence Nurses Society Core Curriculum: Wound Management Laurie McNichol, Catherine Ratliff, Stephanie Yates, 2021-03-02 Written by expert clinicians Core Curriculum Wound Management 2nd Edition is one of the few nursing texts to offer the basic pathology physiology and current clinical skills required for high level wound care This is essential content for those seeking WOC certification including nursing students in wound care programs nurses involved in wound care nurses in gastroenterology urology and surgical nursing graduate nursing students and nursing faculty **Alexander's Nursing Practice** Chris Brooker, Maggie Nicol, Margaret F.
