Loeff,2021-12-14 This thoughtful compassionate book makes a major contribution to our understanding of the Southern Appalachian child his mental disorders and his adaptive strengths Drawing upon his extensive fieldwork as a clinical child psychiatrist in Eastern Kentucky Dr Loeff suggests means by which these children can be helped to bridge the gap between their subculture and the mainstream of American life today The children described in this book the author points out are in a real sense not all children Since no child grows up in a vacuum the children of Eastern Kentucky cannot be understood apart from the historical geographic and socioeconomic characteristics of the area in which they grow Knowledge of the children requires some knowledge of the lives of parent teachers and the many others upon whom they are dependent That is to say mental disorder or mental health is embedded in a social matrix Dr Loeff therefore examines the milieu of these Southern Appalachian children their future as adults and how they can achieve their potential whether in their native or an urban setting In viewing the children within their own cultural framework Dr Loeff shows how they develop toward mental health or psychopathology suggesting supportive techniques that build upon the strengths inherent in each child These strengths he suggests rise out of the same culture that burdens the child with handicaps Dr Loeff s position is one of guarded optimism based on the successes of the techniques he has used and observed in seven years of work in Appalachian field clinics Although he details instances of mental disorder in children and instances of failure in family functioning he notes at the same time family strengths and sees these strengths as sources of hope Although this book is based on fieldwork techniques within a specific area and culture it is paradigmatically suggestive of wider application Dr Loeff demonstrates effectively and clearly the profound need for increased concern about what is happening to the rising generation the children of Eastern Kentucky the children of the Southern Appalachian region and the children of the rural south I Want to Go to Heaven... Hudson,2003-01-01 Brief biographies and primary secondary source bibliographies are presented for each author Authors of note are Harriette Simpson Arnow Annie Dillard Wilma Dykeman Denise Giardina Barbara Kingsolver and George Ella Lyon **Research Reports** United States. Commission on Population Growth and the American Future,1972 Aspects of Population Growth Policy United States. Commission on Population Growth and the American Future,1972 Education In Rural America Jonathan P. Sher,2019-04-10 Indifference has not always characterized American attitudes toward rural children nor has neglect always been the cornerstone of state and federal policy toward rural education Indeed for nearly a century there was an avid and

influential though ultimately ineffective rural school reform movement in the United States But in recent years rural education has become a skeleton in the closet of the education profession More than 14 million children attend rural schools that receive only minuscule amounts of the nation s financial resources and professional attention The authors of this book carefully analyze the beliefs assumptions policies and practices that have shaped and continue to shape education in rural America concluding that conventional wisdom in rural education has proved to be considerably more conventional than wise They offer pragmatic suggestions for changes in rural schools in educational policy and in programs designed for rural communities As Robert Coles tells us in his Foreword to the book they give us clear strong uncluttered prose a good sign that they are able to offer sensible honest unpretentious suggestions and useful ideas They give us a social history that enables perspective and they give us practical well argued suggestions for a public policy both humane and capable of realization for our rural areas
