Prostaglandin System:

The Prostaglandin System F. Berti, 2013-06-29 Prostaglandin research is one of the most explosive fields in the biological science and there have been a number of international symposia on this subject In planning the second Advanced Course in Erice Sicily at the Ettore Majorana center it was realized that large congresses might not represent the best way to facilitate communication within specialized areas of biologic and medical research In fact small meetings where in depth discussion is confined to a limited number of scientists are now generally considered successful vehicles of scientific information With this in mind we made an effort in collecting a number of experts in both experimental and clinical use of these important arachidonate metabolites We have been very fortunate in bringing together a faculty of international authorities who contributed to the course with brilliant presentations and lively discussion Thus this book represents an up to date overview of the physiology and pharmacology of different products derived from arachidonic acid metabolism associated with outstanding suggestions of their clinical potential It is our hope that from this Advanced Course and its resulting publication new ideas concerning the physio pathological role of these compounds will arise together with new directions for future research We are deeply indebted to NATO for its interest and generous support which made this Second Course a reality

Cardiovascular and Renal Systems P.V. Halushka, Dale E. Mais, 2012-12-06 The original series Advances in Prostaglandin

Research edited by Sultan M M Karim was published by MTP Press in three volumes in 1975 and 1976 A glance at those books illustrates the progress that has been made since then The thromboxanes were mentioned twice first publication 1975 and prostacyclin not once first publication 1976 leukotrienes were only on the horizon The amazing generation of research data in the last 10 15 years has given new broad insights into many areas including asthma inflammation renal cardiovascular and gastrointestinal diseases and in reproduction and has led in some instances to real clinical benefit This series *Advances in Eicosanoid Research* reflects the current understanding of prostaglandins thromboxanes and leukotrienes The aim is to provide an introductory background to each topic and the most up to date information available Although each book stands alone the eicosanoids cut across many boundaries in their basic actions selected chapters from each book in the series will provide illuminating and productive information for all readers which will advance their education and research In the production of this series I must acknowledge with pleasure my collaboration with editors and authors and the patient endeavours of Dr Michael Brewis and the staff at MTP Press *The Prostaglandins* Peter Ramwell, 2013-11-11

Prostaglandins and the Kidney Michael Dunn, 2013-11-11 In June 1981 we conducted a two day international symposium in Rome devoted to original scientific presentations on arachidonic acid metabolism in the kidney Scientists from 20 countries were represented either in the general scientific program or in the poster presentation This book does not represent the proceedings of this international gathering but rather the edited manuscripts specifically prepared as summaries of the scientific presentations We feel that the timeliness and originality of the contributions as well as the need for a compilation of existing work on prostaglandins thromboxane and the kidney warrant this publication The meetings would have been impossible without the generous and substantial support of the Italian government the National Institutes of Health United States Public Health Service and Merck Sharp Dohme International Supplementary support was also received from Ciba Geigy S p A Ente Fiuggi Farmitalia Carlo Erba S p A Glaxo Laboratori S p A Hoechst Italia S p A Leo Pharmaceutical Products Pfizer Italiana S p A Sigm Tau S p A Squibb S p A The Upjohn Company Wellcome Italia S p A and Burroughs Wellcome Company The efficient organization of the symposium was largely attributable to the superb efforts of Elisabeth Mutschlechner and Miki Scarinci of C K International Rome Linda Goldberg provided expert and invaluable editorial and secretarial assistance in the organization of this book The book is divided into four major sections comprising I
