Prostate Tales:

Prostate Tales Ross E. Gray, 2003 *Prostate Tales* reveals through story and drama the crises struggles sorrows challenges and triumphs of men living with prostate cancer and those who care about them **Tales of a Country Obstetrician**

Daniel M. Avery, 2012-12-13 Daniel M Avery has been fascinated with the human body ever since he was young so it was natural that he should grow up to become a successful doctor As a funeral director he had his first opportunity to learn about anatomy disease processes and trauma He even witnessed the medical examiner performing autopsies in the morgue Once he became a doctor his adventures were more interesting although there are decisions he regrets For instance he would have never called the university to tow away an illegally parked recreation vehicle if he had known it belonged to the dean of the medical school In spite of the seriousness of the medical profession he enjoyed his share of light moments as well When a female resident delivered a baby and got blood all over her she asked if she could borrow a pair of underwear We wear different sizes and I only have one pair Dr Avery replied All physicians have at one time or another wished they had written down the highlights of their careers Dr Avery does so with no regrets examining the challenges adventures and funny moments that have defined his life as an Alabama doctor in *Tales of a Country Obstetrician* Men's Health Alex

Broom, Philip Tovey, 2009-02-24 This book explores the social political and theoretical underpinnings of the men's health field Written by experts in the field it provides a comprehensive understanding of the relationships between cultural understandings and health related issues It looks at important issues such as prostate cancer chest pain and heart disease and how men experience such problems It examines sexuality mental illness and ethnicity as well as the role that sport can play in men's health outcomes **Life Begins at 65** Matthew E. McLaren, 2008-10-09 The words prostate cancer overheard in casual conversation are enough to cause the average male to cringe To actually be diagnosed with this condition is to many a devastating blow from which they never recover neither emotionally nor physically Matthew McLaren received the blow and turned it into a twofold opportunity First he overcame his own cancer Secondly he gave us detailed roadmaps so that others in the same situation can find their way out of it or better yet to bypass the quagmire entirely by taking simple preventative measures This book is must reading both for anyone who has prostate cancer or wishes to prevent it and for anyone who treats this condition or dispenses information about it Within these covers Matthew has created a virtual encyclopedia of the etiology anatomy physiology biochemistry and treatments of prostate cancer written in a style that is easy to understand by lay people and thorough enough for practitioners He interweaves science and personal experience in a delightful way The theme of this book is self empowerment Our body comes with its own innate healing power It can cure itself of any condition provided we give it the conditions it needs to do so and in a timely manner Matthew details what those conditions are Much of the wisdom he expresses herein applies not only to prostate cancer but also to other forms of cancer and to disease in general *Social Work Artfully* Christina Sinding, Hazel Barnes, 2015-04-20 The past two decades have

witnessed a vigorous challenge to social work A growing global convergence between the market and the public sector means that private sector values priorities and forms of work organization increasingly permeate social and community services As challenges facing people and communities become more layered and complex our means of responding become more time bound and reductionist This book is premised on the belief in the revitalizing power of arts informed approaches to social justice work it affirms and invites creative responses to personal community and political struggles and aspirations The projects described in the book address themes of colonization displacement and forced migration sexual violence ableism and vicarious trauma Each chapter shows how art can facilitate transformation by supporting processes of conscientization and enabling re-storying of selves and identities by contributing to community and cultural healing sustainability and resilience by helping us understand and challenge oppressive social relations and by deepening experiences images and practices of care Social Work Artfully Beyond Borders and Boundaries emerges from collaboration between researchers educators and practitioners in Canada and South Africa It offers examples of arts informed interventions that are attentive to diversity attuned to various forms of personal and communal expression and cognizant of contemporary economic and political conditions **Applied Theatre, Third Edition** Monica Prendergast, Juliana Saxton, Yasmine Kandil, 2024-02-20

Croston, 2012-11-06 We live in a world of risk It waits for us in our refrigerator and surrounds us on the freeway It s lurking in our arteries and sitting in our 401 k accounts Given that we deal with risk on a constant basis we should be good at it as it turns out though we re not We re blind to common risks like heart disease one in five deaths but we shrink in fear from rare events like shark attacks one in a million and airplane crashes one in twenty thousand What accounts for our poor ability to perceive and react to the risks that really matter Starting from an evolutionary perspective the author traces our distorted perception of risk back to our ancestors reminding readers that we are all the culmination of a long line of survivors who fought life and death threats such as attacks from wild animals starvation and disease The fact that we have covered Earth with seven billion people is a testament to our skill at overcoming these risks But our spectacular success has also produced our contemporary artificial world with new threats like climate change chili dogs and online gambling Our brains which evolved to deal with the ancient world are ill equipped to process the new threats we face Croston examines the many facets of our hazardous modern environment that we only dimly perceive He explains why we let our guard down for a beautiful face why slow moving risks like rising seas are hard to stop how a good story though false can be more persuasive than dry statistics even alarming ones what we fear even more than death and many other intriguing quirks about our built in incompetence to adequately handle present day risks Offering a wealth of fascinating information about health sex money safety food and the environment this book illuminates an often misunderstood but crucial aspect of daily life
