Protected Landscapes P.H.C. Lucas, 1992-06-30 Many countries have areas with special natural qualities characterized by the harmonious interaction between resident populations and the land This book sets out the varied approaches to establishing such areas as protected landscapes It provides guidance on criteria for selection of landscapes implementation management and the legal measures involved if protection is to be achieved International Concepts in Protected Landscapes, 2001 **Protected Landscapes** John Foster, 1988 Protected Landscapes and Agrobiodiversity Values

Thora Amend, 2008 Presents twelve case studies from different parts of the world illustrating the role Protected Landscapes are playing in conserving agrobiodiversity and related knowledge and practices This title includes a synthesis that focuses on the key lessons to be learned from these case studies **Protected Landscapes and Cultural and Spiritual Values**

Josep-Maria Mallarach, Josep Maria Mallarach i Carrera, 2008 Documents using case studies the non material values that are to be found in protected landscapes Protected landscapes and wild biodiversity Nigel Dudley, 2012 **The Protected**

Landscape Approach Jessica Brown, Nora J. Mitchell, Michael Beresford, 2005 The traditional patterns of land use that have created many of the world's cultural landscapes contribute to biodiversity support ecological processes provide important environmental services and have proven sustainable over the centuries Protected landscapes can serve as living models of sustainable use of land and resources and offer important lessons for sustainable development Examples of these landscapes and the diverse strategies needed to maintain this essential relationship between people and the land are provided *The Economic Value of Landscapes* C. Martijn van der Heide, Wim Heijman, 2013-01-03 This book aims to explore the avenue of landscape economics and provides the building blocks from different scientific disciplines for an economic analysis of landscapes What exactly constitutes and determines the value of a landscape It focuses on the value of landscapes in its broadest sense thereby covering a variety of topics including stakeholder involvement in landscape design landscape governance and landscape perceptions from different countries Merely saying that landscapes have value or are important is not sufficient not when resources are scarce and have alternative uses Measuring and quantifying the economic value of changes in landscapes would help ensure that landscape management decisions are both economically rational and sound

Landscape and Sustainability John Benson, Maggie Roe, 2007-08-07 This unique book addresses the issue of sustainability from the point of view of landscape architecture dealing with professional practices of planners designers and landscape managers This second edition contains updated and new material reflecting developments during the last five years and comprehensively addresses the relationship between landscape architecture and sustainability Much in the text is underpinned by landscape ecology in contrast to the idea of landscape as only appealing to the eye or aspiring cerebrally to be fine art Landscape and Sustainability establishes that the sustainability agenda needs a new mindset among professionals the driving question must always be is it sustainable Developing theory into practice from the global to the local scale and

from issues of policy and planning through to detailed design and implementation and on to long term maintenance and management the contributors raise and re examine a complex array of research policy and professional issues and agendas to contribute to the necessary ongoing debate about the future of both landscape and sustainability Landscape Conservation IUCN World Commission on Protected Areas.
