"America Can Recover" Thomas R. Meinders, 2011-02-28 America Can Recover from the past few years of reckless spending programs that the people have not endorsed Everyone needs to contact their representatives in the Congress and make it known what the American people want It is not too late if we take actions Remember if you dont voice your opinions for the changes you feel are correct then you become part of the problem instead of part of the solution We can accomplish our goal if we set our minds and efforts to the task We need to wake up the American voters while we still have some rights in this country Not only that we have the God given right to question the actions of the politicians that are making decisions in Washington We would be fools if we allow ourselves to blindly follow the politicians We were given brains and were meant to use them to think about the issued that affect our everyday lives in this country The uninformed uneducated and easily manipulated that are among us follow the line of thinking that has been presented to them by the leaders in Washington It is past time for the citizens of the United States to start realizing what has been happening and make some changes

Fortunately it is still not too late **Protecting Our Ports** Suzette R. Grillo, Rebecca J. Cruise, 2016-04-08 Since the terrorist attacks of September 11 2001 there has been much discussion of the security of borders and ports of entry in the United States and around the world Ports of entry particularly sea ports are viewed as one of the most defenceless targets for a terrorist attack In response to this perceived vulnerability a number of port security initiatives have been implemented both on both a domestic and international level This timely project investigates a number of issues surrounding the container security issue It examines the scope of containerized freight security analyzes cooperation between agents in the United States and abroad explores the politics of port security and provides an assessment of 17 of the world s sea ports The work sheds light on the container security threat and the domestic and international responses that have emerged as well as those steps that still must be taken **The 9/11 Commission Report: Complete Edition** Thomas R. Border Security United States. Congress. House. Committee on Homeland Security. Subcommittee on Border, Maritime, and Global Counterterrorism,2009 Homeland Security James J. F. Forest,2006-06-30 America is a target the homeland is under threat While Americans have been targets of terrorist attacks for quite some time September 11 2001 awoke the nation to the reality that we are vulnerable in our homes our places of work and worship and our means of public transportation And yet we must continue to function as best we can as the world s most vibrant economic and political community The current threat environment requires greater engagement with the public as the necessary eyes and ears of the nation s homeland security infrastructure However to be effective the public must be equipped with the knowledge of where and why specific locations and activities may be a terrorist target what is being done to protect those targets and how they can help This three volume set answers that need The chapters of each volume of Homeland Security revolve around a core of central questions Are we safer today than we were pre 9 11 What steps have been taken in all these areas to protect ourselves What are the threats we face and what new threats have developed since 9 11 Are we staying one step ahead of those who wish to do us harm In 2002 more than 400 million people 122 million cars 11 million trucks 2 4 million freight cars and 8 million containers entered the United States Nearly 60 000 vessels entered the United States at its 301 ports of entry Clearly the amount of activity this represents will require a long term commitment to innovation organizational learning and public vigilance to complement an already overstretched network of government agencies and security professionals
