Protecting Children Online? Tijana Milosevic, 2018-02-23 A critical examination of efforts by social media companies including Facebook Twitter Snapchat and Instagram to rein in cyberbullying by young users High profile cyberbullying cases often trigger exaggerated public concern about children s use of social media Large companies like Facebook respond by pointing to their existing anti bullying mechanisms or coordinate with nongovernmental organizations to organize anti cyberbullying efforts Do these attempts at self regulation work In this book Tijana Milosevic examines the effectiveness of efforts by social media companies including Facebook Twitter YouTube Snapchat and Instagram to rein in cyberbullying by young users Milosevic analyzes the anti bullying policies of fourteen major social media companies as recorded in companies corporate documents draws on interviews with company representatives and e safety experts and details the roles of nongovernmental organizations examining their ability to provide critical independent advice She draws attention to lack of transparency in how companies handle bullying cases emphasizing the need for a continuous independent evaluation of effectiveness of companies mechanisms especially from children s perspective Milosevic argues that cyberbullying should be viewed in the context of children s rights and as part of the larger social problem of the culture of humiliation Milosevic looks into five digital bullying cases related to suicides examining the pressures on the social media companies involved the nature of the public discussion and subsequent government regulation that did not necessarily address the problem in a way that benefits children She emphasizes the need not only for protection but also for participation and empowerment for finding a way to protect the vulnerable while ensuring the child s right to participate in digital spaces

This is an open access book. Currently, the influence of shifts and changes in the legal system due to global political, social, and economic dynamics demands significant changes to harmonize and adapt the various realities of human relations which are currently dominated by various activities in cyberspace. Law is the most important and strategic instrument in organizing the space for social interaction and changes in other social institutions and institutions in the current era. Therefore, it is not only about 3 legal instruments such as norms, legal institutions, and their enforcement, but the most important thing is legal education, which will build not only legal instruments and systems but also awareness of a new legal culture. Thus, structuring legal education and its educational ecosystem, which is connected to other aspects such as economics, social, cultural, religious, political, and so on, is a necessity that continues to be developed. Law is also the glue and device of a world that is all connected and cross-border connected to the digital world as well as an interconnected global society making an agreement on a common global goal to help individuals, institutions, and governments throughout the world to agree on the direction of development, focusing on things that are truly beneficial for the future, directing all parties to focus on the same thing, mobilizing all resources, and making it easier to organize and implement so that all parties can move together towards the achievements they hope for. By having a common goal, every policy and development step taken by every national leader will always be tested by the public. This means that a common goal provides a common opportunity for all elements of society to control the entire development process in order to remain faithful to the path towards mutual achievement, encouraging mobilization of all networks of expertise, knowledge, and practices to overcome various difficulties faced in implementing sustainable development and mobilize all stakeholder networks. This multi-stakeholder process is critical to addressing complex challenges in sustainable development and the fight against poverty, hunger, and disease. In line with the global agenda called Sustainable Goals Development, especially point 4 of the SDGs, which sets the goal of providing quality education, this is also included in the world of legal education. The SDGs goals above are interconnected and influence each other. To achieve the SDGs goals, collaboration and cooperation are needed. These SDGs are a global commitment to achieve better sustainable development. Every country, including Indonesia, has a responsibility to achieve the SDGs goals. By paying attention to sustainability aspects in every decision and action, we can build a better and more sustainable future for future generations. Thus, there is a need for strategic partnerships, especially at the national and regional levels, which will harmonize various curricula and learning methods, especially in the field of law, in order to achieve a parameter of success in the development of national and regional law, which is one of the elements of the resilience of a country or region. This is considered necessary and strategic, considering that currently the dynamics of the region are being influenced by global

turmoil in various fields as well as the ongoing struggle for hegemony among world geopolitical and geoeconomic forces in the new world balance order Therefore this international seminar and call for papers is an opportunity for participants to find out about harmonization and strategic cooperation in legal education especially in the era of disruption economic and digital and to know its relevance for development at the ASEAN level Educational Research and Innovation Educating 21st Century Children Emotional Well-being in the Digital Age OECD,2019-10-01 This report examines modern childhood looking specifically at the intersection between emotional well being and new technologies It explores how parenting and friendships have changed in the digital age It examines children as digital citizens and how best to take advantage of online opportunities while minimising the risks The volume ends with a look at how to foster digital literacy and resilience highlighting the role of partnerships policy and protection **Protecting Children on the Internet** United States.
