

The background of the cover is a photograph of a mountain landscape. In the foreground, there is a calm lake reflecting the sky. The middle ground shows a wide river valley with green hillsides. In the background, rugged mountains with patches of snow or light-colored rock rise against a blue sky with some clouds. The entire image is framed by a dark green border.

Protecting Canada's Endangered Spaces Monte Hummel, 1995 A practical manual for all Canadians as the owners of something magnificent that can be protected kept and saved or neglected taken from us and lost 1995 **Canada Ecology and Nature Protection Handbook Volume 1 Strategic Information and Developments** IBP, Inc., 2017-01-10 2011 Updated Reprint Updated Annually Canada Ecology Nature Protection Handbook **Politics of the Wild** Karen Beazley, Robert Boardman, 2001 Politics of the Wild details the 353 species at risk in Canada and considers both the intrinsic and the instrumental reasons for protecting biological diversity It examines the need for habitat protection terrestrial protected areas such as national parks marine species at risk and the various legislative and interest group attempts to preserve biodiversity Public policy on endangered species is considered from both historical and comparative perspectives as is Canada's role in establishing international agreements the Convention on International Trade in Endangered Species and the Convention on Biological Diversity and the government's failure in recent years to meet the obligations of these and other environmental agreements The final chapter looks at the Species at Risk Act SARA and its recent predecessor Bill C 65 and reveals the difficulties of crafting and passing such legislation in an increasingly decentralized federal state such as Canada Both legislative attempts were criticized by the environmental policy community for not doing enough and by the provinces and business for trying to do too much All the while diverse regional interests and economic imperatives run the risk of endangering far more than merely Canadian species at risk *Canadian Issues in Environmental Ethics* Wesley Cragg, Allan Greenbaum, Alex Wellington, 1997-06-10 Is it possible to design a forest policy that satisfies ethical and environmental concerns and is acceptable to business labour and First Nations representatives What is the best path through the tangle of ethical issues surrounding the collapse of the east coast fishery What sort of obligations does a rich nation such as Canada have to satisfy the claims of global environmental justice These are the sorts of issues in applied ethics that are tackled in this collection of essays the vast majority of which have been written especially for this volume It is the first Canadian collection of its kind The book is divided into sections detailing with such topics as the environment and the economy ethical issues relating to non human animals issues of gender and issues relating to native peoples Most of the authors are philosophers though specialists in geography geology and the social sciences are also among the contributors Frequent reference is made to theoretical ethical concerns but the focus throughout is on applied ethics and a variety of case studies are included Examples include essays on animal rights and the case of native hunters surface mining in Northern Ontario the Quebec arctic and fishing communities in the Maritimes Comparisons are frequently drawn to policies and ethical questions arising in other countries most prominently the United States **Environmental Law in Canada** Jamie Benidickson, 2023-06-20 Derived from the renowned multi volume International Encyclopaedia of Laws this book provides ready access to legislation and practice concerning the environment in Canada A general introduction covers geographic

The Subjugation of Canadian Wildlife Max Foran, 2018-04-10 Hardly a day goes by without news of the extinction or endangerment of yet another animal species followed by urgent but largely unheeded calls for action An eloquent denunciation of the failures of Canada's government and society to protect wildlife from human exploitation Max Foran's *The Subjugation of Canadian Wildlife* argues that a root cause of wildlife depletions and habitat loss is the culturally ingrained beliefs that underpin management practices and policies Tracing the evolution of the highly contestable assumptions that define the human wildlife relationship Foran stresses the price wild animals pay for human self interest Using several examples of government oversight at the federal provincial and territorial levels from the Species at Risk Act to the Biodiversity Strategy Protected Areas Network and provincial management plans this volume shows that wildlife policies are as much or more about human needs priorities and profit as they are about preservation Challenging established concepts including ecological integrity adaptive management sport hunting as conservation and the flawed belief that wildlife is a renewable resource the author compels us to recognize animals as sentient individuals and as integral components of complex ecological systems A passionate critique of contemporary wildlife policy *The Subjugation of Canadian Wildlife* calls for belief change as the best hope for an ecologically healthy wildlife rich Canada
