Protection Internationale De L'environnement:

Protection internationale de l'environnement Laurence Boisson de Chazournes, 2005 **La protection internationale de l'environnement** Alexandre Charles Kiss, 1977 **Droits de l'investisseur étranger et protection de l'environnement** Sabrina Robert-Cuendet, 2010-05-12

En droit international de l'investissement le prisme de l'expropriation indirecte couvre une large catégorie de mesures telles que les réglementations qui n'impliquent pas de transfert de propriété mais aboutissent à une grave interférence avec un investissement. La définition des possessions indemnisables constitue une question extrêmement sensible située à la croisée des chemins entre la protection des droits des investisseurs et la préservation des prérogatives de l'Etat. Cet ouvrage explore à travers l'exemple de la réglementation environnementale le droit applicable à cette notion controversée. Il montre que l'approche traditionnelle reposant sur une dilution du concept d'expropriation n'est nullement appropriée et il contribue à clarifier l'étendue de la protection de l'investisseur sur le fondement du droit de la responsabilité internationale de l'Etat.

In international investment law the prism of indirect expropriation includes a broad range of measures such as regulatory measures which do not involve a transfer of property but result in a serious interference with an investment. The definition of compensable taking is a very sensitive issue situated at the crossroads between the protection of investors' private rights and the safeguarding of the state's sovereign prerogatives. This book explores through the example of environmental regulation the law applicable to this controversial topic. It suggests that the traditional approach based on an extension of the concept of expropriation is inappropriate and it contributes to clarifying the scope of the international protection of the investor on the ground of the law of state responsibility.

Vers quel droit de protection internationale de l'environnement ? Ana Flávia Barros-Platiau, 2002

La protection de la biodiversité globale et le contrôle des changements climatiques sont deux exemples contemporains d'une gestion collective des questions environnementales au nom de l'humanité. Eu égard aux avatars récents du système international et à la croissante régulation des rapports internationaux qui en découle, la question est de savoir à travers la perception brésilienne quel droit de la protection internationale de l'environnement est en voie de construction. Ce texte vise à montrer qu'un tel droit est construit à l'aide des régimes internationaux spécifiques malgré leur interdépendance écologique et des politiques globales pour l'environnement de cette manière le développement juridique est analysé dans un contexte de rapports de force entre acteurs statiques et non statiques sous le sceau de la compétitivité économique au détriment du paradigme de développement durable. En conséquence le droit international de la protection internationale de l'environnement a voulu considérablement ces trois dernières décennies. Des principes tels que celui de la précaution de l'usage rationnel des ressources naturelles de la responsabilité et du devoir d'informer sont désormais cristallisés dans les textes juridiques. Toutefois la tension entre la liberté souveraine des Etats nationaux et leur responsabilité internationale pose problème dans le sens où la mise en œuvre et le contrôle des engagements cibles sont déficients tant les enjeux environnementaux sont importants. Aussi la protection internationale de l'

environnement est elle encore dans une tape d inculcation des valeurs communes dans le conscient collectif de la communauté internationale avant qu'un véritable droit de la protection internationale de l'environnement ne puisse être construit et accepté par tous , *Recueil Des Cours, Collected Courses 1980* ,1983-03-21 The Academy is a prestigious international institution for the study and teaching of Public and Private International Law and related subjects The work of the Hague Academy receives the support and recognition of the UN Its purpose is to encourage a thorough and impartial examination of the problems arising from international relations in the field of law The courses deal with the theoretical and practical aspects of the subject including legislation and case law All courses at the Academy are in principle published in the language in which they were delivered in the Collected Courses of the Hague Academy of International Law
