Protection And Industrial Policy In Europe:

Protection and Industrial Policy in Europe Joan Pearce, R. A. Batchelor, 1985-01-01 **EU Industrial Policy in the Multipolar Economy** Defraigne, Jean-Christophe, Wouters, Jan, Traversa, Edoardo, Zurstrassen, Dimitri, 2022-10-14 This incisive book provides key interdisciplinary perspectives on the current challenges faced by EU policymakers in framing and implementing a coherent European industrial policy employing specific case studies from the digital automotive steel and defence industries as well as concrete examples of EU policies [The Industrial Policies of Great Britain and the United States](#) James Moore Swank, 1876 **Foreign Policies of EU Member States** Amelia Hadfield, Ian Manners, Richard G. Whitman, 2017-06-14 Foreign Policies of EU Member States provides a clear and current overview of the motivations and outcomes of EU Member States regarding their foreign policy making within and beyond the EU It provides an in depth analysis of intra EU policy making and sheds light in an innovative and understandable way on the lesser known aspects of the inter EU and extra EU foreign policies of the twenty eight Member States The text has an innovative method of thematic organisation in which case study state profiles emerge via dominant foreign policy themes The text examines the three main policy challenges currently faced by the twenty eight Member States First EU Member States must cooperate within the mechanisms of the EU including the Common Foreign and Security Policy CFSP Second EU Member States continue to construct their own inter EU foreign policies Third the sovereign prerogative exercised by all EU Member States is to construct their own foreign policies on everything from trade and defence with the rest of the world This combination of clarity thematic structure and empirical case studies make this an ideal textbook for all upper level students of European foreign policy comparative European politics and European studies *Do Institutions Matter?* R. Kent Weaver, Bert A. Rockman, 2010-12-01 As a stunning tide of democratization sweeps across much of the world countries must cope with increasing problems of economic development political and social integration and greater public demand of scarce resources That ability to respond effectively to these issues depends largely on the institutional choices of each of these newly democratizing countries With critics of national political institutions in the United States arguing that the American separation of powers system promotes ineffectiveness and policy deadlock many question whether these countries should emulate American institutions or choose parliamentary institutions instead The essays in this book fully examine whether parliamentary government is superior to the separation of powers system through a direct comparison of the two In addressing specific policy areas such as innovation and implementation of energy policies after the oil shocks of 1970 management of societal cleavages setting of government priorities in budgeting representation of diffuse interest in environmental policy and management of defense forces the authors define capabilities that allow governments to respond to policy problems Do Institutions Matter includes case studies that bear important evidence on when and how institutions influence government effectiveness The authors discover a widespread variation among parliamentary systems both in

institutional arrangements and in governmental capabilities and find that many of the failings of policy performance commonly attributed to American political institutions are in fact widely shared among western industrial countries Moreover they show how American political institutions inhibit some government capabilities while enhancing others Changing American institutions to improve some aspects of governmental performance could hurt other widely valued capabilities The authors draw important guidelines for institutional reformers while emphasizing that institutions do have predictable risks and opportunities They caution that a balance between such risks and opportunities must first be reached before policy reformers try to change political institutions

The Political Economy of European Security Kaija Schilde,2017-09-14

What is the relationship between private actors and international institutions in global governance as institutions such as the EU develop aspects of political authority once in the sole domain of nation states Important areas of recent EU development have been immigration security and defense policies Are these EU policies the result of strategic imperatives or are they also driven by the political economy of markets Kaija Schilde argues that answers require evaluating the EU in the comparative tradition of the political development of authority Drawing on industry documents interviews interest group data an original survey and comparative political theory The Political Economy of European Security demonstrates that interest groups can change the outcomes of developing political institutions because they provide sources of external capacity which in turn can produce authority over time In this way the EU is like a developing state in its relationship with interest groups

Towards a European Foreign Policy J.K. de Vree,Peter Coffey,R.H. Lauwaars,2024-08-26

Emerging Security Technologies and EU Governance Antonio Calcara,Raluca Csernatonu,Chantal Lavallée,2020-06-10 This book examines the European governance of emerging security technologies The emergence of technologies such as drones autonomous robotics artificial intelligence cyber and biotechnologies has stimulated worldwide debates on their use risks and benefits in both the civilian and the security related fields This volume examines the concept of governance as an analytical framework and tool to investigate how new and emerging security technologies are governed in practice within the European Union EU emphasising the relational configurations among different state and non state actors With reference to European governance it addresses the complex interplay of power relations interests and framings surrounding the development of policies and strategies for the use of new security technologies The work examines varied conceptual tools to shed light on the way diverse technologies are embedded in EU policy frameworks Each contribution identifies actors involved in the governance of a specific technology sector their multilevel institutional and corporate configurations and the conflicting forces values ethical and legal concerns as well as security imperatives and economic interests This book will be of much interest to students of science and technology studies security studies and EU policy Chapter 11 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
