Protective Immediacy:

Protective Immediacy Rod Smith, 1999 Poetry Available again Rod Smith is his exact height and has basically quit playing golf This precision and narrowing of focus permit him to arrange many parts of speech in interesting patterns kept flat within this book but ready to spring out like so many Q tipped Slinkies as the age old hinge flexes Working within the post Olsonian precept what does not explain is the will to explain he destroyed the footnotes to this blurb before they were written Too late the magnet hidden in these texts has already blanked your memory and begun to teach your thumbs to oppose again Tom Raworth Rod Smith is the author of IN MEMORY OF MY THEORIES THE BOY POEMS and THE LACK LOVE POEMS

Threatcasting Brian David Johnson, Cyndi Coon, Natalie Vanatta, 2022-06-01 Impending technological advances will widen an adversary's attack plane over the next decade Visualizing what the future will hold and what new threat vectors could emerge is a task that traditional planning mechanisms struggle to accomplish given the wide range of potential issues Understanding and preparing for the future operating environment is the basis of an analytical method known as Threatcasting It is a method that gives researchers a structured way to envision and plan for risks ten years in the future Threatcasting uses input from social science technical research cultural history economics trends expert interviews and even a little science fiction to recognize future threats and design potential futures During this human centric process participants brainstorm what actions can be taken to identify track disrupt mitigate and recover from the possible threats Specifically groups explore how to transform the future they desire into reality while avoiding an undesired future The Threatcasting method also exposes what events could happen that indicate the progression toward an increasingly possible threat landscape This book begins with an overview of the Threatcasting method with examples and case studies to enhance the academic foundation Along with end of chapter exercises to enhance the reader's understanding of the concepts there is also a full project where the reader can conduct a mock Threatcasting on the topic of the next biological public health crisis The second half of the book is designed as a practitioner's handbook It has three separate chapters based on the general size of the Threatcasting group that walk the reader through how to apply the knowledge from Part I to conduct an actual Threatcasting activity This book will be useful for a wide audience from student to practitioner and will hopefully promote new dialogues across communities and novel developments in the area

Trinidad, Denise Duhamel, Maureen Seaton, 2007-03-06 Collaborative poetry poems written by one or more people grew out of word games played by French surrealists in the 1920s It was taken up a decade later by Japan's Vou Club and then by Charles Henri Ford who created the chainpoem composed by poets who mailed their lines all over the world After WW II the Beat writers collaborative experiments resulted in the famous Pull My Daisy The concept was embraced in the 1970s by

feminist poets as a way to find a collective female voice Yet for all its rich history virtually no collections of collaborative poetry exist This exhilarating anthology remedies the omission Featured are poems by two four even as many as 18 people in a dizzying array of forms villanelles to ghazals sonnets to somonkas pantoums to haiku even quizzes questionnaires and other nonliterary forms Collaborators notes accompany many of the poems giving a fascinating glimpse into the creative process
