This report states that the values of the NHS will only be reflected in practice if NHS and social care services are re imagined. The care provided by the health and social care system will break down if quicker progress is not made to develop more integrated health and social care services which focus on meeting the needs of individual patients. It is unlikely that public expenditure on health and social care services will increase significantly in the foreseeable future. This means that the only way to sustain or improve present service levels in the NHS will be to focus on a transformation of care through genuine and sustained service integration. There must be a much more joined up approach to commissioning health and care services. On other issues the Health Committee also concludes measures currently being used to respond to the Nicholson Challenge too often represent short term fixes rather than the sustainable long term service transformations. Changes in tariff payments within the NHS do not constitute efficiency savings; they are simply internal transfers under spending against budget of money allocated to the NHS. This has attracted adverse comment and the MPs call for a general review of the operation of Treasury rules. The NHS will not be able to rely on the present rate of paybill savings once the present restraints on public sector pay are relaxed in April 2013.

Collected Works Of Larry Wos, The (In 2 Vols), Vol I: Exploring The Power Of Automated Reasoning; Vol II: Applying Automated Reasoning To Puzzles, Problems, And Open Questions Gail W Pieper, Larry Wos, 2000-01-21. Automated reasoning programs are successfully tackling challenging problems in mathematics and logic, program verification and circuit design. This two volume book includes all the published papers of Dr Larry Wos, one of the world's pioneers in automated reasoning. It provides a wealth of information for students, teachers, researchers and even historians of computer science about this rapidly growing field. The book has the following special features: 1. It presents the strategies introduced by Wos which have made automated reasoning a practical tool for solving challenging puzzles and deep problems in mathematics and logic. 2. It provides a history of the field from its earliest stages as mechanical theorem proving to its broad base now as automated reasoning. 3. It illustrates some of the remarkable successes automated reasoning programs have had in tackling challenging problems in mathematics, logic, program verification and circuit design. 4. It includes a CD ROM with a searchable index of all the papers, enabling readers to peruse the papers easily for ideas.
