*Philosophy of Pseudoscience* Massimo Pigliucci, Maarten Boudry, 2022-12-22 A remarkable contribution to one of the most vexing problems in science the demarcation problem or how to distinguish science from nonscience Francisco J Ayala author of Darwin's Gift to Science and Religion What sets the practice of rigorously tested sound science apart from pseudoscience In this volume the contributors seek to answer this question known to philosophers of science as the demarcation problem This issue has a long history in philosophy stretching as far back as the early twentieth century and the work of Karl Popper But by the late 1980s scholars in the field began to treat the demarcation problem as impossible to solve and futile to ponder However the essays that Massimo Pigliucci and Maarten Boudry have assembled in this volume make a rousing case for the unequivocal importance of reflecting on the separation between pseudoscience and sound science Moreover the demarcation problem is not a purely theoretical dilemma of mere academic interest it affects parents decisions to vaccinate children and governments willingness to adopt policies that prevent climate change Pseudoscience often mimics science using the superficial language and trappings of actual scientific research to seem more respectable Even a well informed public can be taken in by such questionable theories dressed up as science Pseudoscientific beliefs compete with sound science on the health pages of newspapers for media coverage and in laboratories for research funding Now more than ever the ability to separate genuine scientific findings from spurious ones is vital and *The Philosophy of Pseudoscience* provides ground for philosophers sociologists historians and laypeople to make decisions about what science is or isn't A manual to overcome our natural cognitive biases Corriere della Sera Italy

**The Problem with Science** R. Barker Bausell, 2021-01-26 Recent events have vividly underscored the societal importance of science yet the majority of the public are unaware that a large proportion of published scientific results are simply wrong *The Problem with Science* is an exploration of the manifestations and causes of this scientific crisis accompanied by a description of the very promising corrective initiatives largely developed over the past decade to stem the spate of irreproducible results that have come to characterize many of our sciences More importantly Dr R Barker Bausell has designed it to provide guidance to practicing and aspiring scientists regarding how to change the way in which science has come to be both conducted and reported in order to avoid producing false positive irreproducible results in their own work and to change those institutional practices primarily but not exclusively involving the traditional journal publishing process and the academic reward system that have unwittingly contributed to the present crisis There is a need for change in the scientific culture itself A culture which prioritizes conducting research correctly in order to get things right rather than simply getting it published
