The Acid Diaries Christopher Gray, 2010-09-24

An exploration of the personal and spiritual truths revealed through LSD. Reveals that LSD visions weave an ongoing story from trip to trip. Shows that trips progress through three stages: personal issues and pre-birth consciousness, ego loss, and on to the sacred. Explores psychedelic use throughout history including the mass hallucinations common in the Middle Ages and the early therapeutic use of LSD. Toward the end of his fifties, Christopher Gray took for the first time in years a 100 microgram acid trip. So extraordinary and to his surprise so enjoyable were the effects that he began to take the same dose in the same way quietly and on his own once every two to three weeks. In *The Acid Diaries*, Gray details his experimentation with LSD over a period of three years and shares the startling realization that his visions were weaving an ongoing story from trip to trip, revealing an underlying reality of personal and spiritual truths. Following the theories of Stanislav Grof and offering quotes from others' experiences that parallel his own including those of Aldous Huxley, Albert Hofmann and Gordon Wasson, he shows that trips progress through three stages: the first dealing with personal issues and pre-birth consciousness, the second with ego loss, often with supernatural overtones, and the third with sacred spiritual and even apocalyptic themes. Pairing his experiences with an exploration of psychedelic use throughout history including the ergot spawned mass hallucinations that were common through the Middle Ages and the early use of LSD for therapeutic purposes, Gray offers readers a greater understanding and appreciation for the potential value of LSD not merely for transpersonal growth but also for spiritual development.

in the context of psychedelic assisted therapies To date discussions about psychedelics in modern medicine have been dominated by studies in biomedicine However given that cultural factors play a significant role in the subjective effects of psychedelics psychedelics can be considered a uniquely powerful point of convergence between the cultural and biomedical Writers and artists alongside psychiatrists and pharmacologists have participated in shaping the psychedelic experience by drawing on a rich set of approaches that blend narrative arts and humanities concepts to explain and interpret psychedelic experiences and explore consciousness for creative purposes Psychedelic studies past and present emphasize the importance of set and setting or the context of psychedelic consumption and its paramount importance in shaping psychedelic experiences These non pharmacological factors rely on a different set of methods and interpretations that necessarily rely on studies conducted outside of the biomedical sciences
